Media streaming	Wowza, Red5, SoundCloud, IcecastXMPP, WebRTC, Jabber, OpenTok, Ejabberd, Erlang	Chat & Messaging	MPP, WebRTC, Jabber, OpenTok, Ejabberd, Erlang

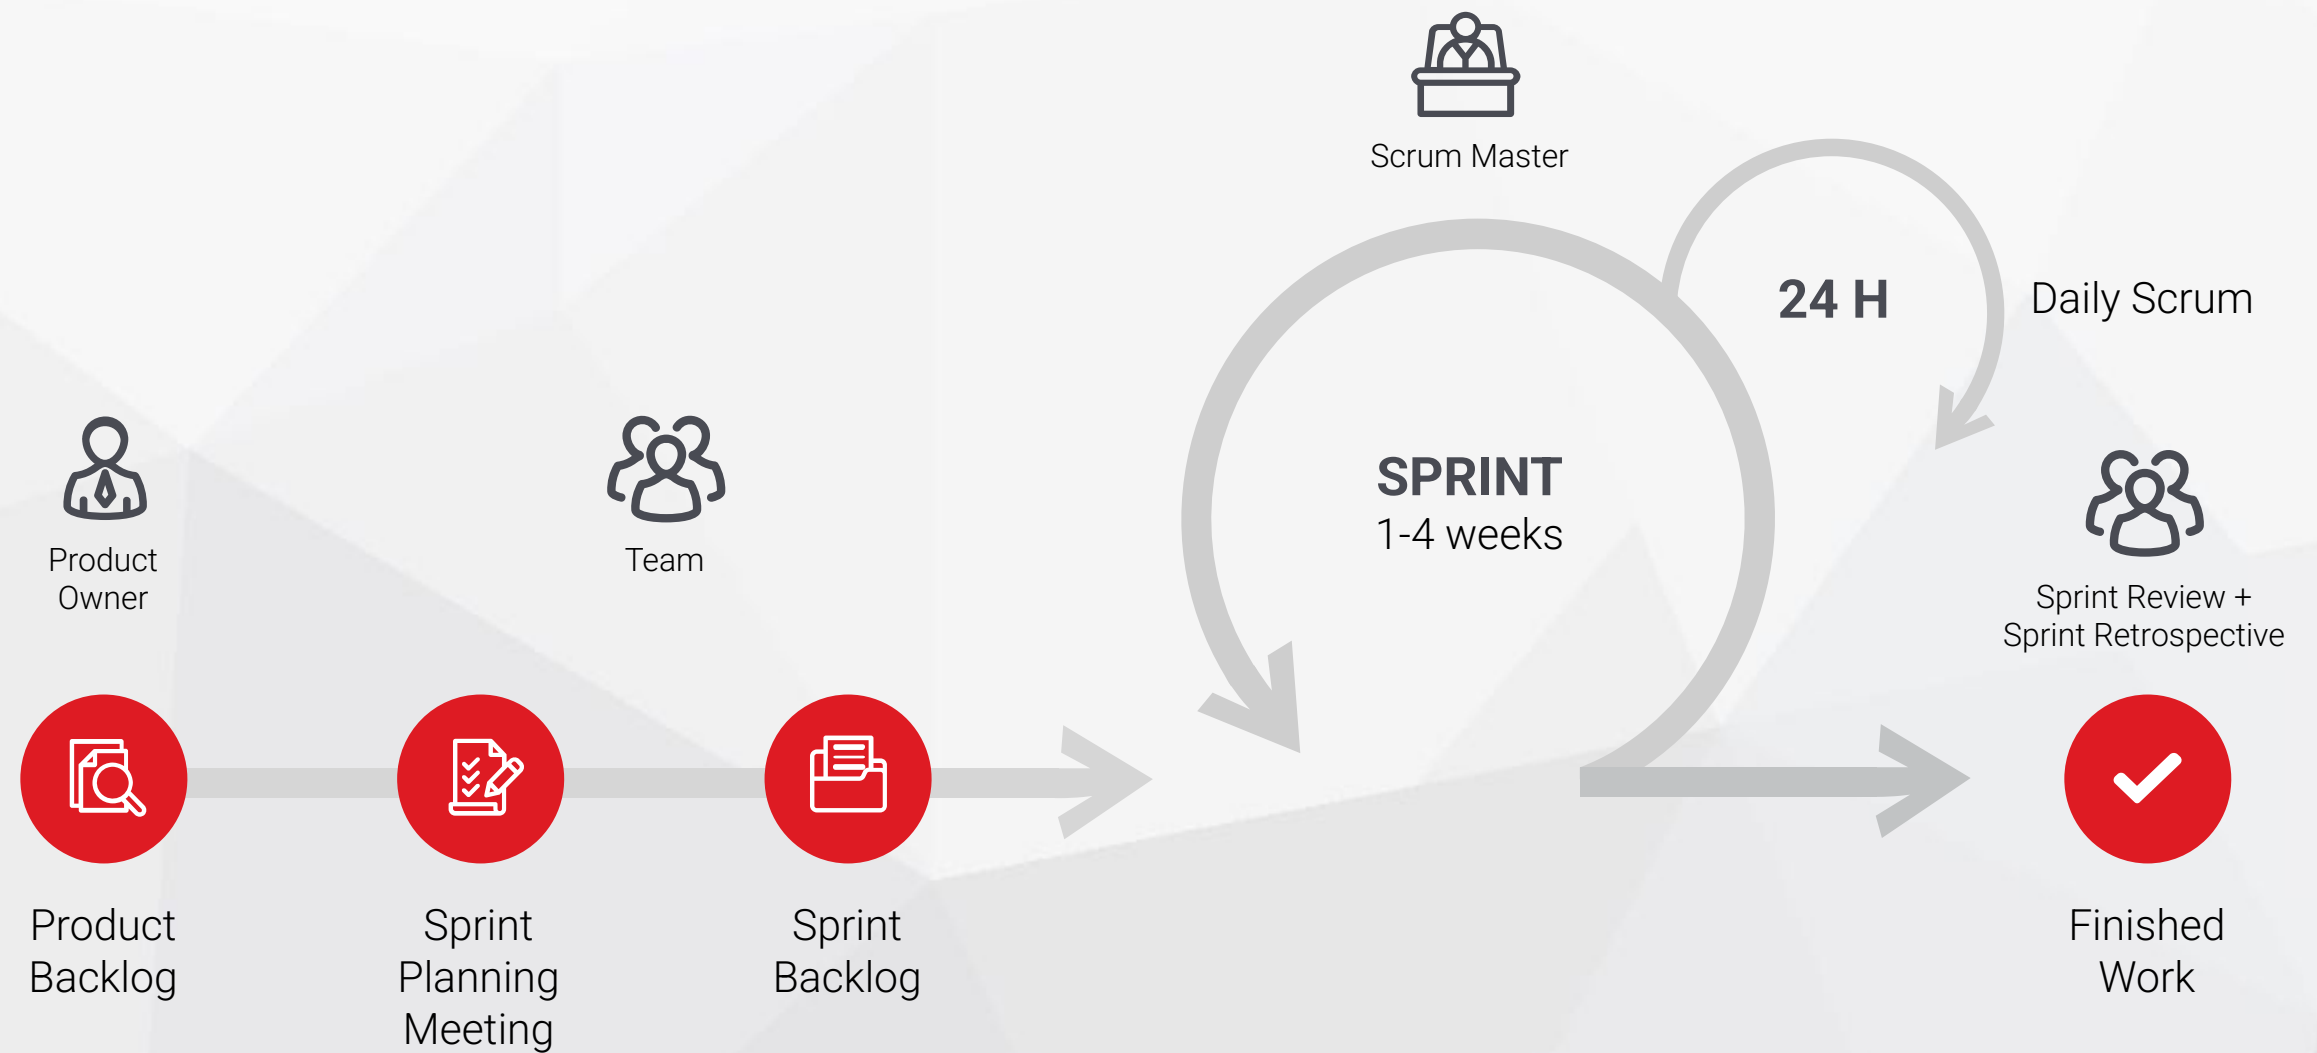

The background of the slide is composed of several overlapping triangles in various shades of red, creating a dynamic, low-poly geometric pattern. The triangles vary in size and orientation, with some pointing towards the center and others towards the edges. The colors range from a deep, dark red to a lighter, almost white red, providing a sense of depth and movement.

Corporate website of a financial company specializing in comprehensive services for the agricultural sector of Ukraine. Credit products, leasing with a catalog, a convenient personal account and many useful integrations for business clients.

WORLD OF LUXURY

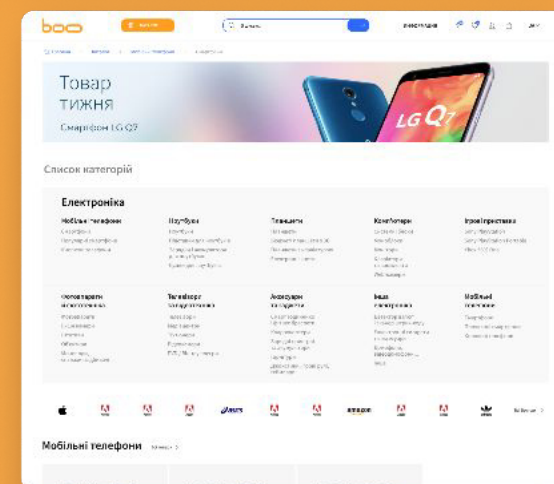

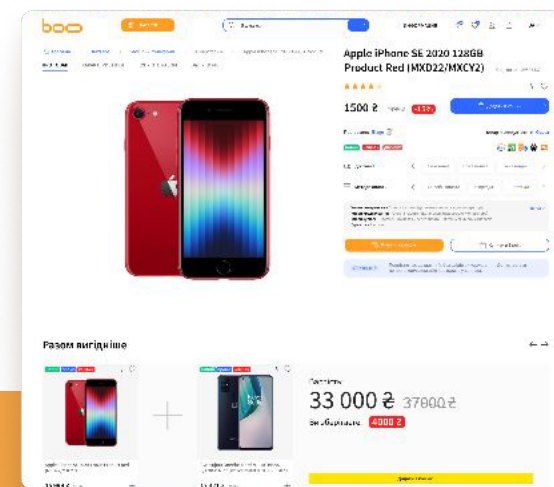

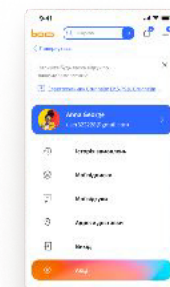

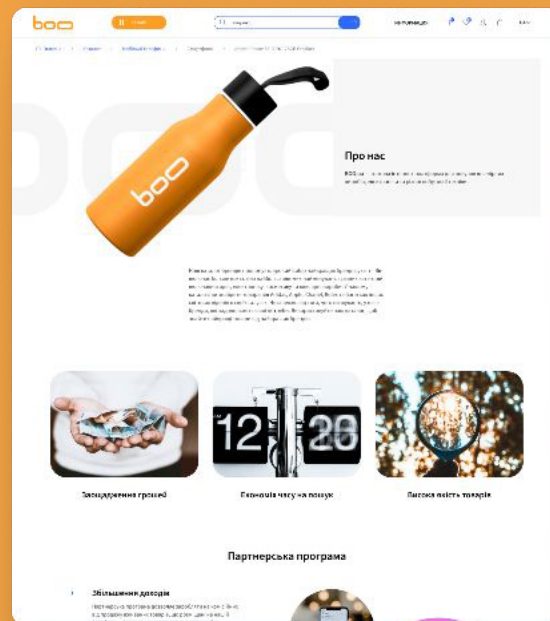

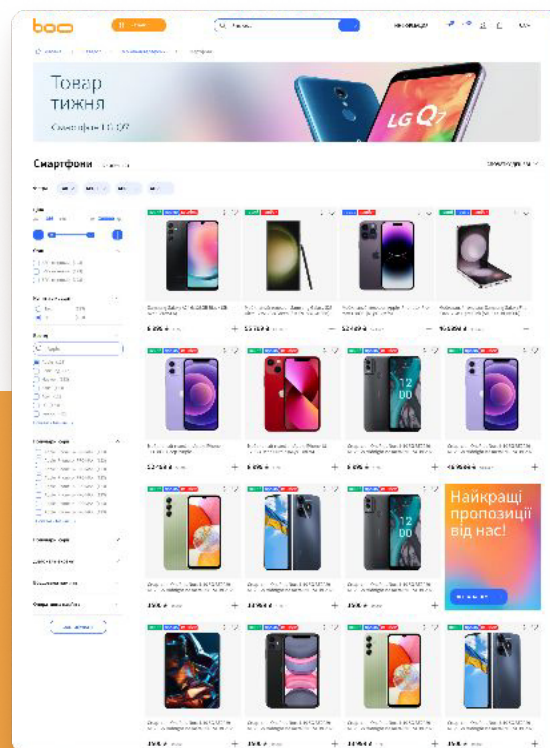

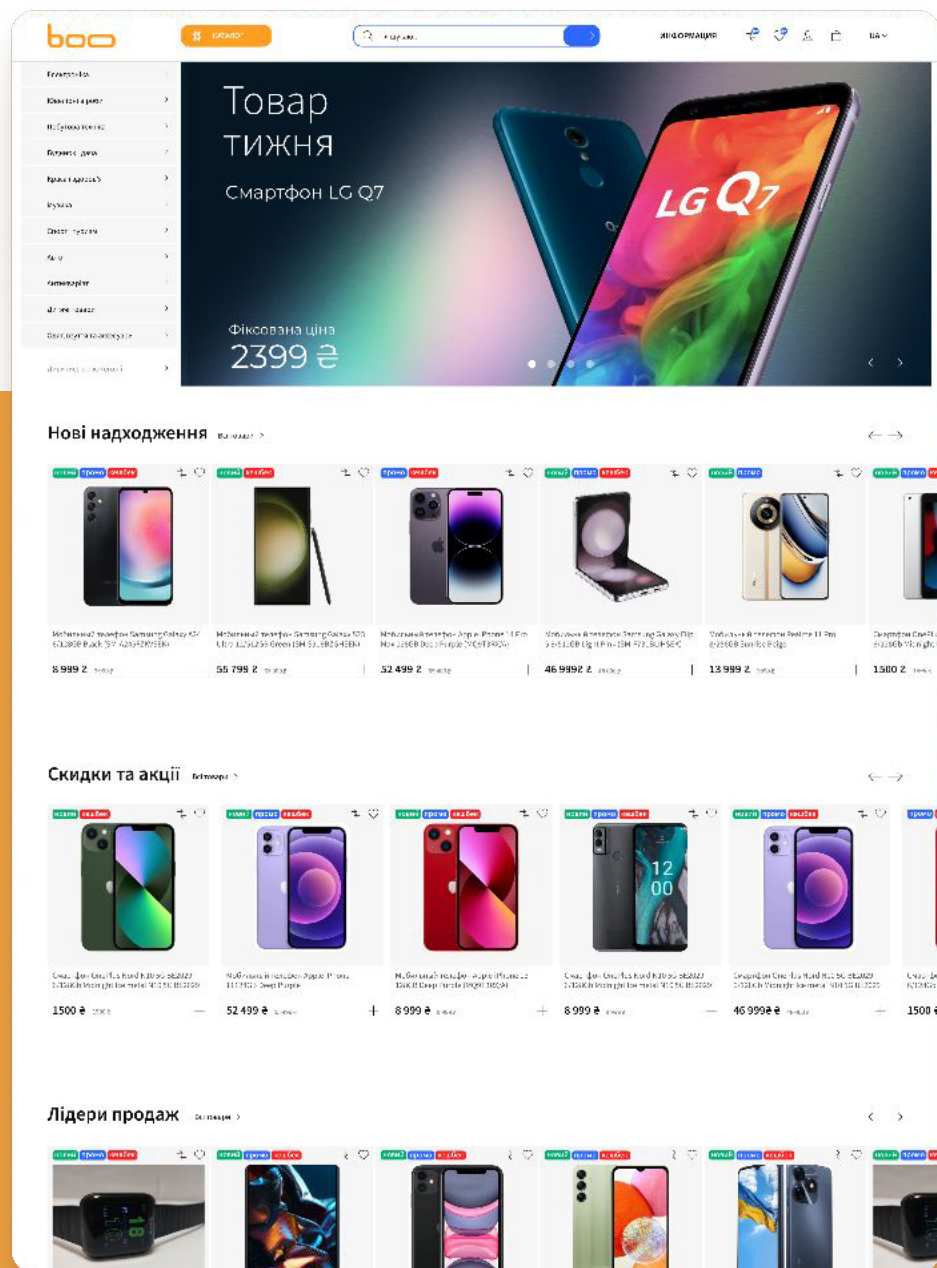

We developed a new vision for both the mobile and desktop versions of the company's online store and accompanying flyers. We created an attractive and effective presentation of the company's products in the online environment, which corresponds to the modern trends of online stores.

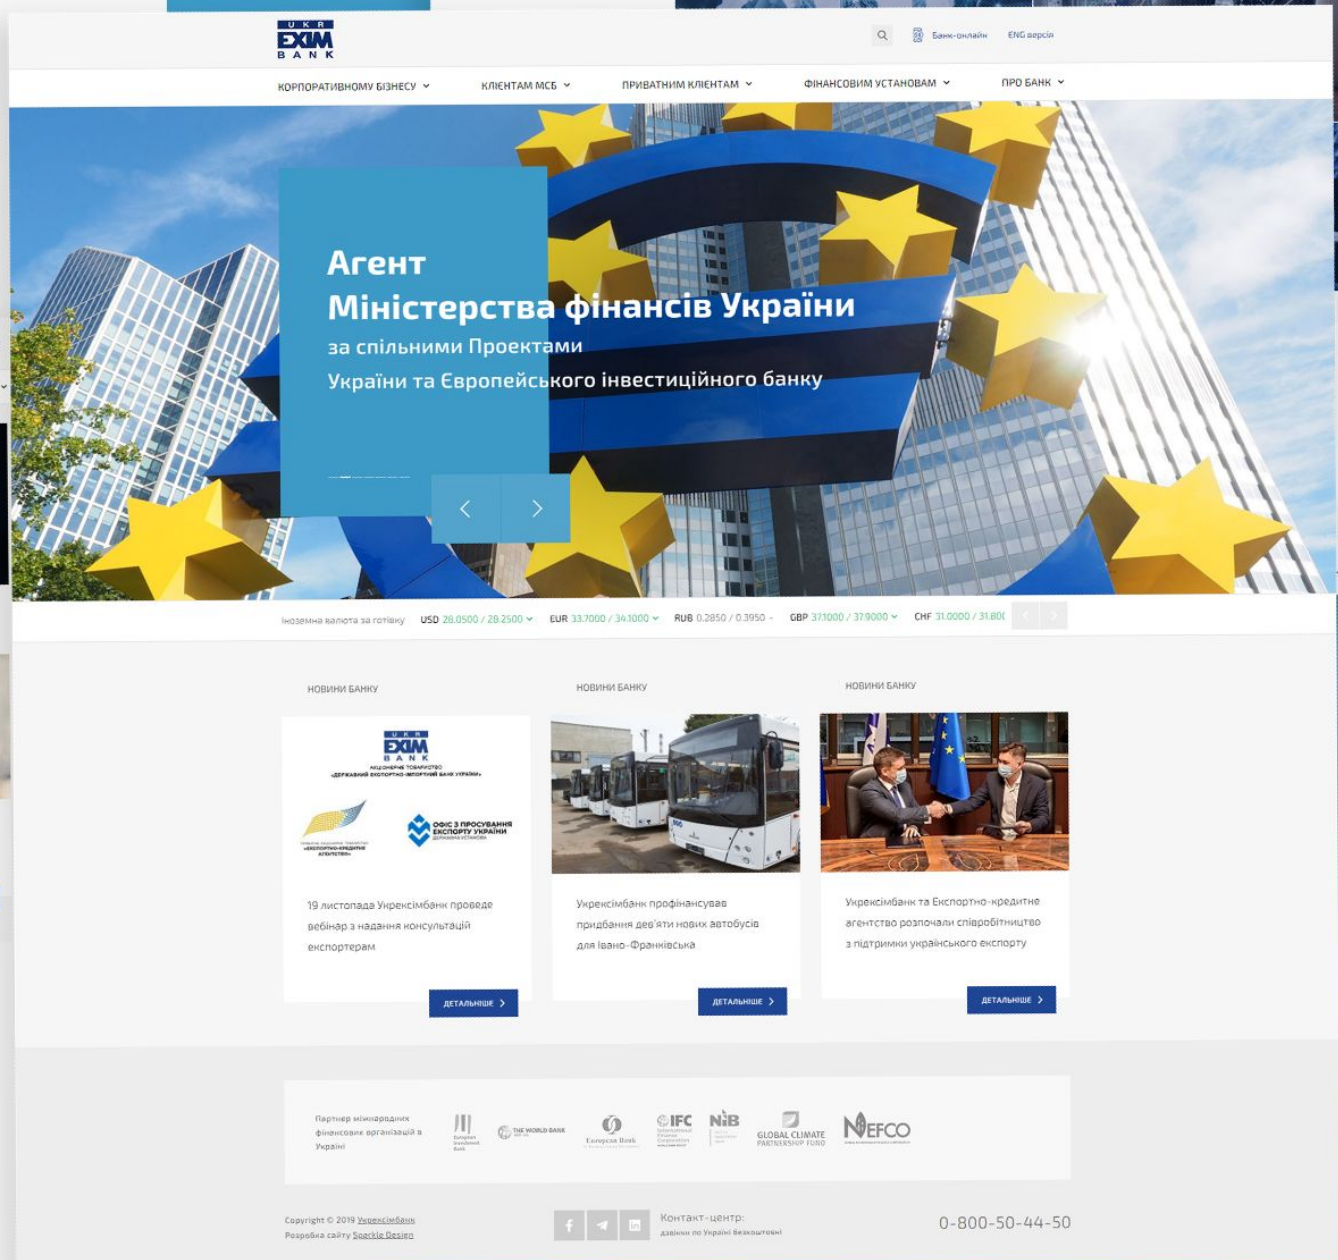

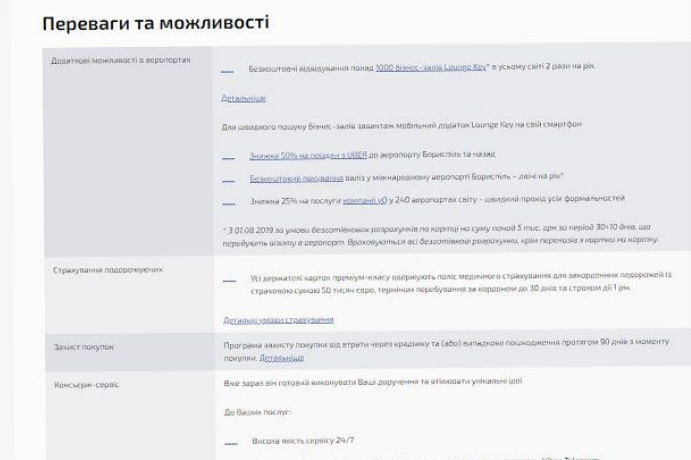

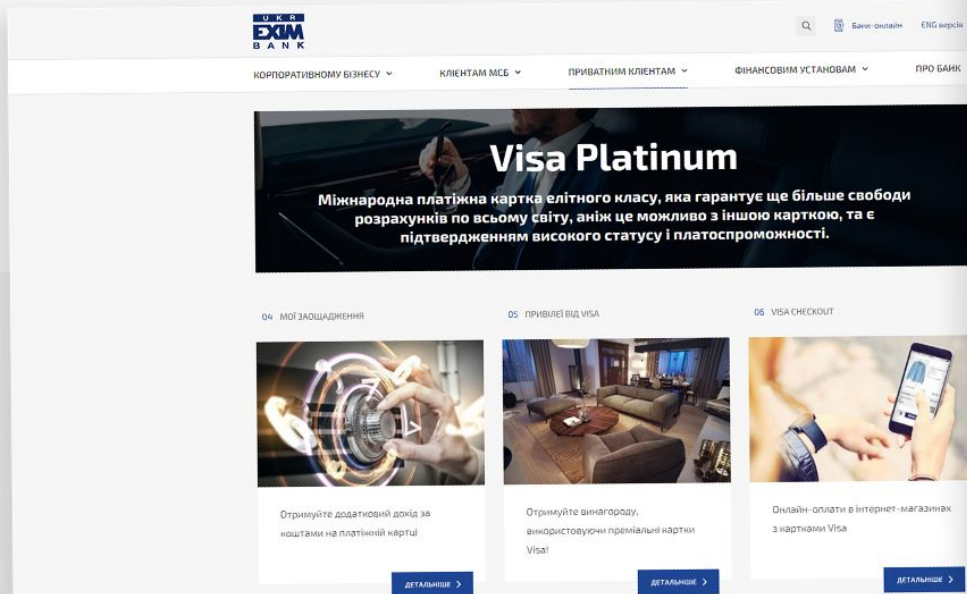

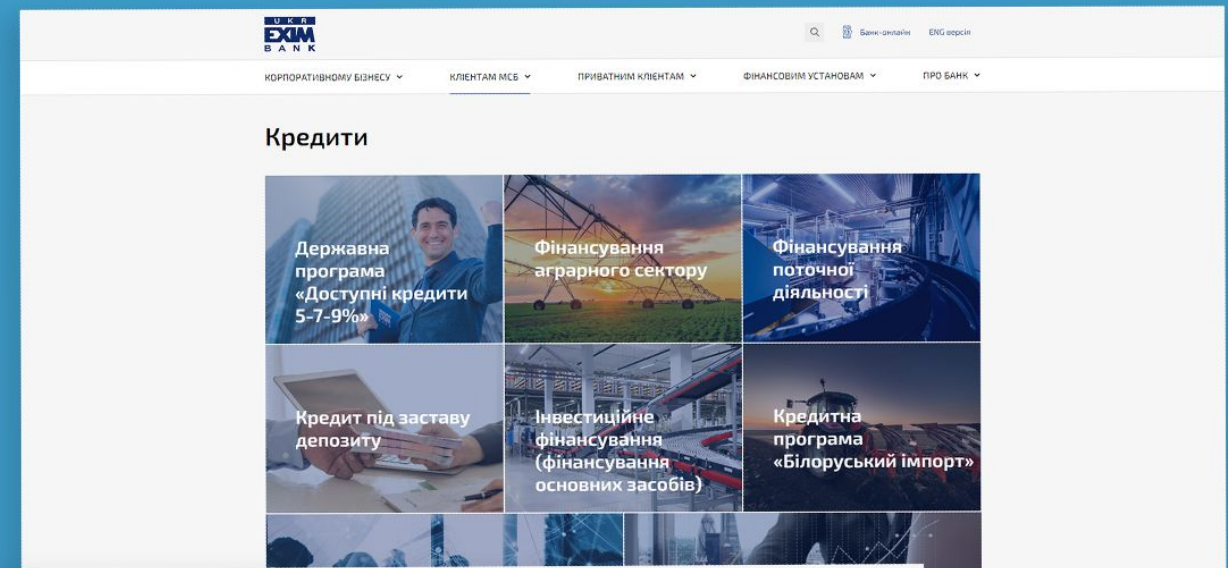

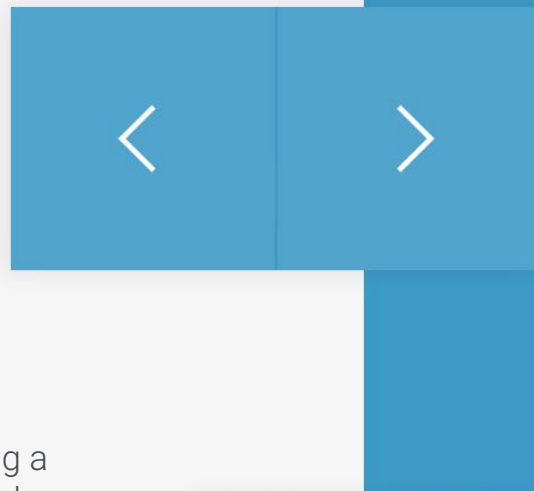

We have developed an intuitively understandable interface with advanced functionality. For verified suppliers, we have designed a B2B dashboard with the ability to moderate their offers. For end-users, we have created a personal dashboard where they can track the status of their purchases.

An excellent catalog, where each product can exist in a unique instance, along with multi-level filtering and intelligent search, formed the basis of the entire project's architecture.

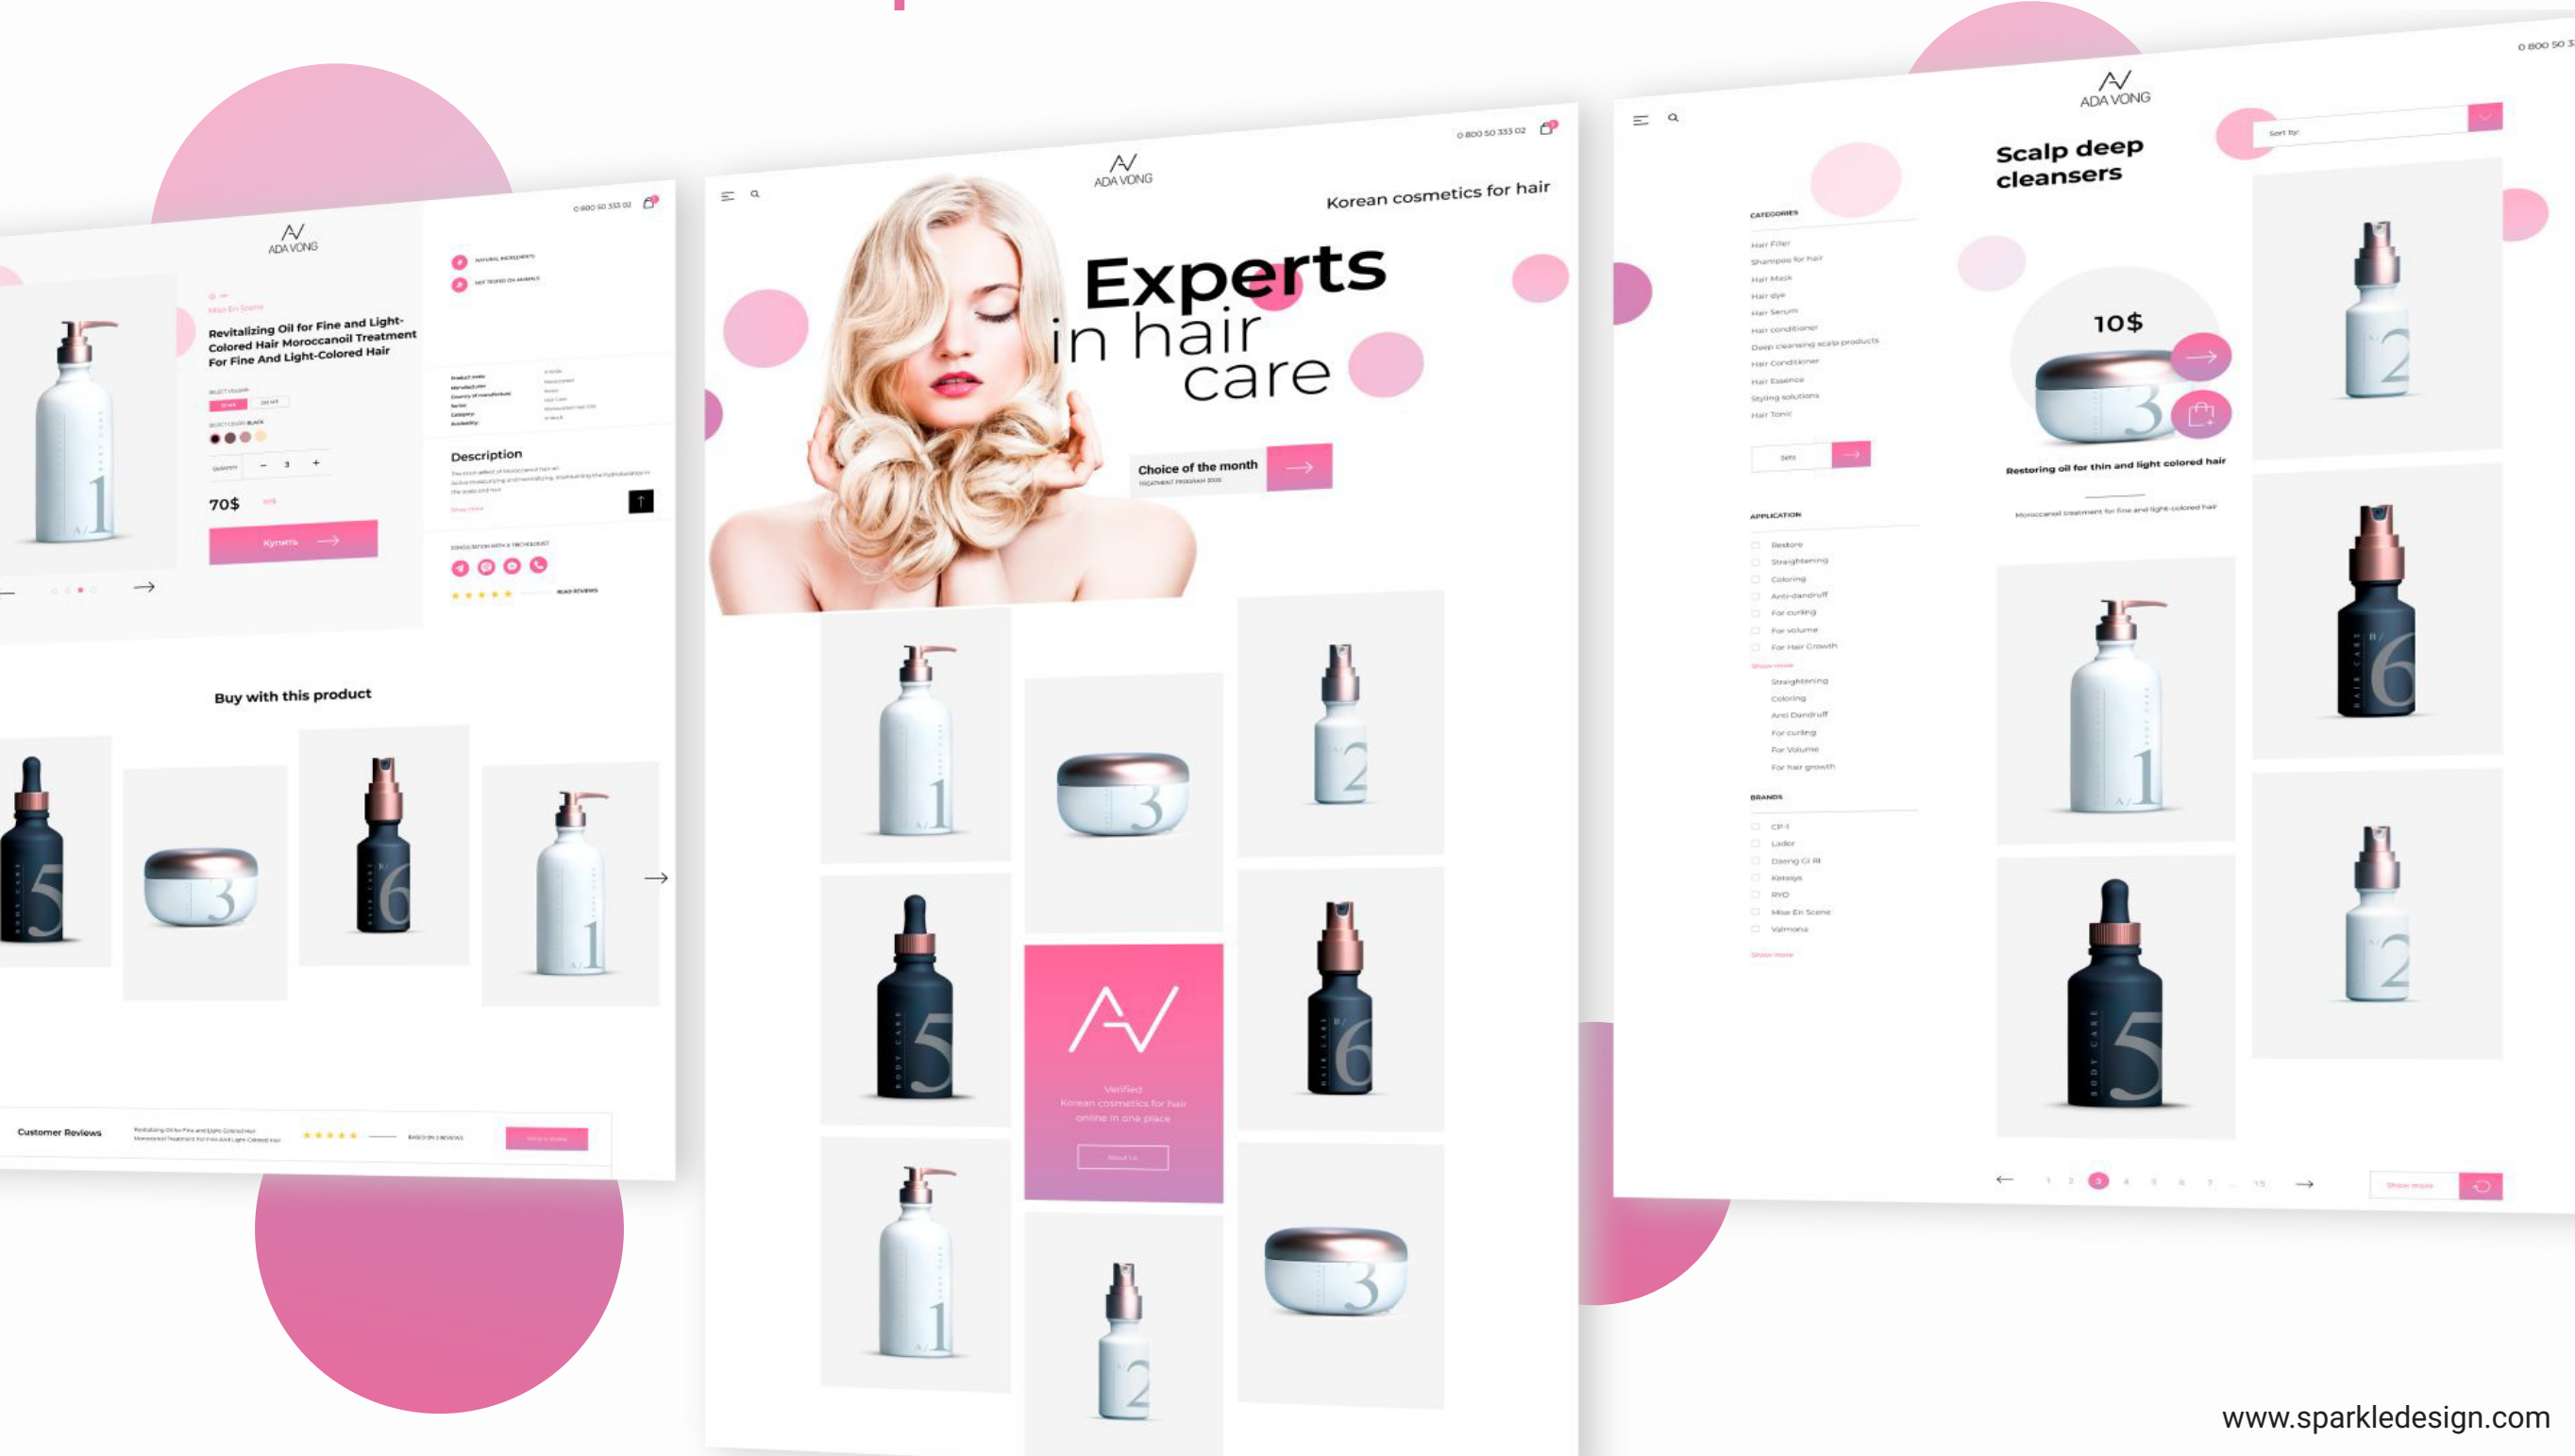

We redesigned the corporate website, creating a modern image of the Bank. The client received an automated integrations and a customizable internal page builder for the site. For users, the site has become laconic and accessible.

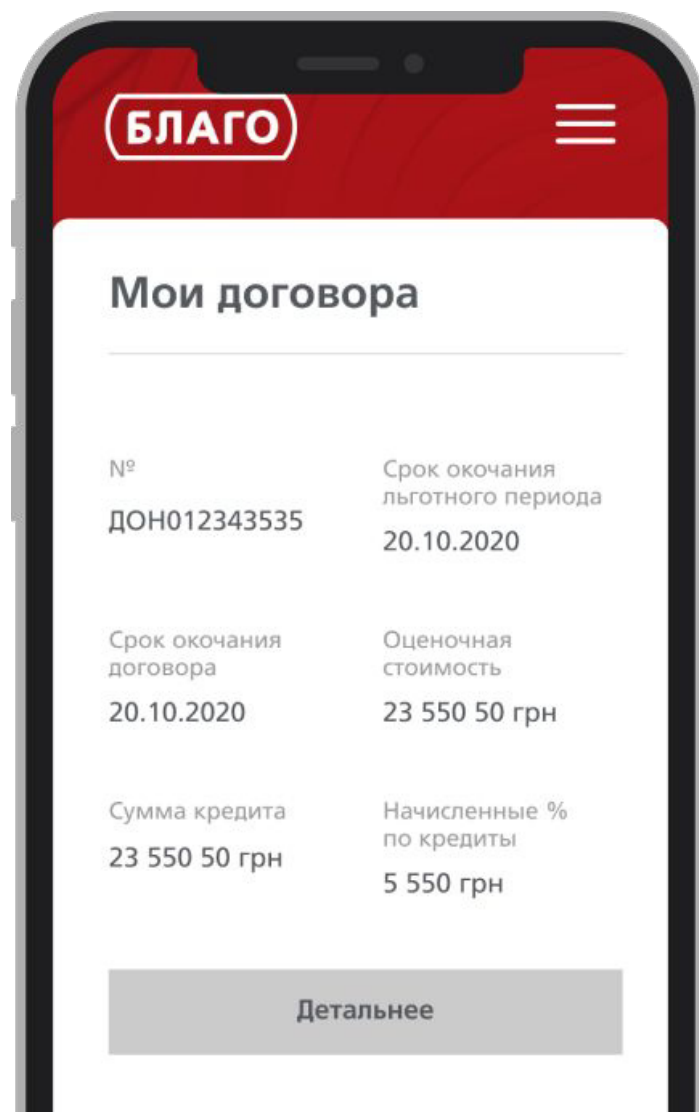

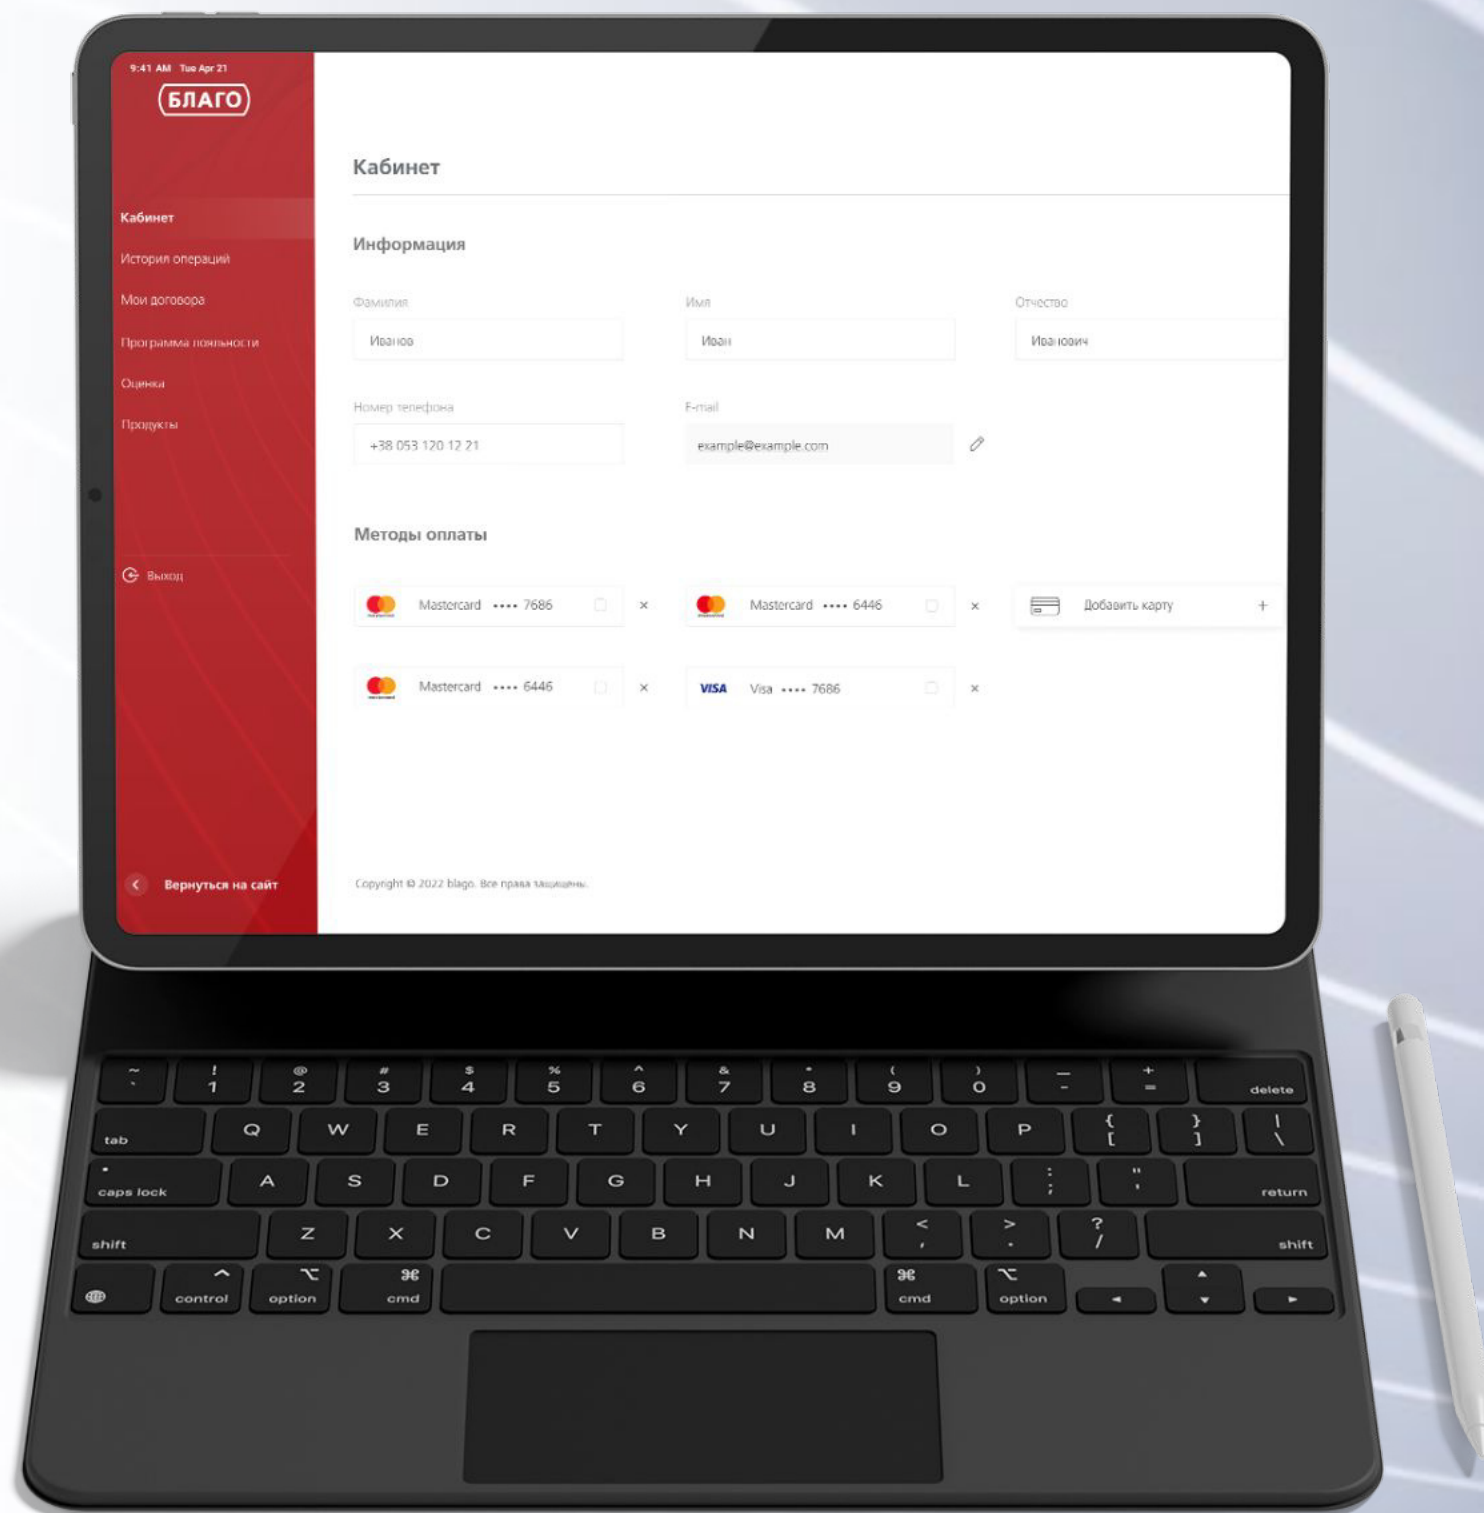

Thanks to the joint efforts of our team specialists, and professionals from the client's side, we managed to develop an exemplary e-commerce project. Modern unique design, powerful tools for sales, page builder. Also, a comprehensive marketing strategy and positioning were developed, advice on branding was given, as well as an original design for the online store was created.

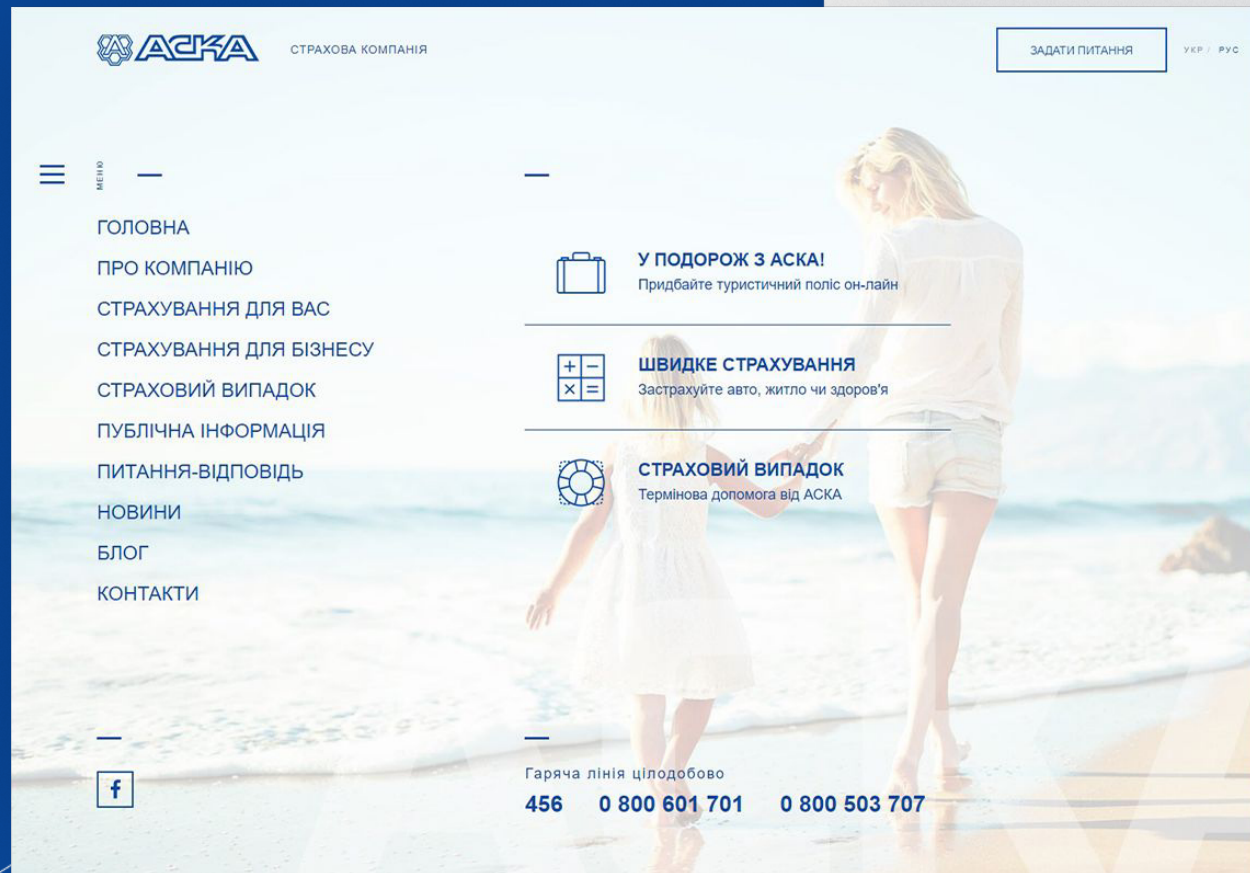

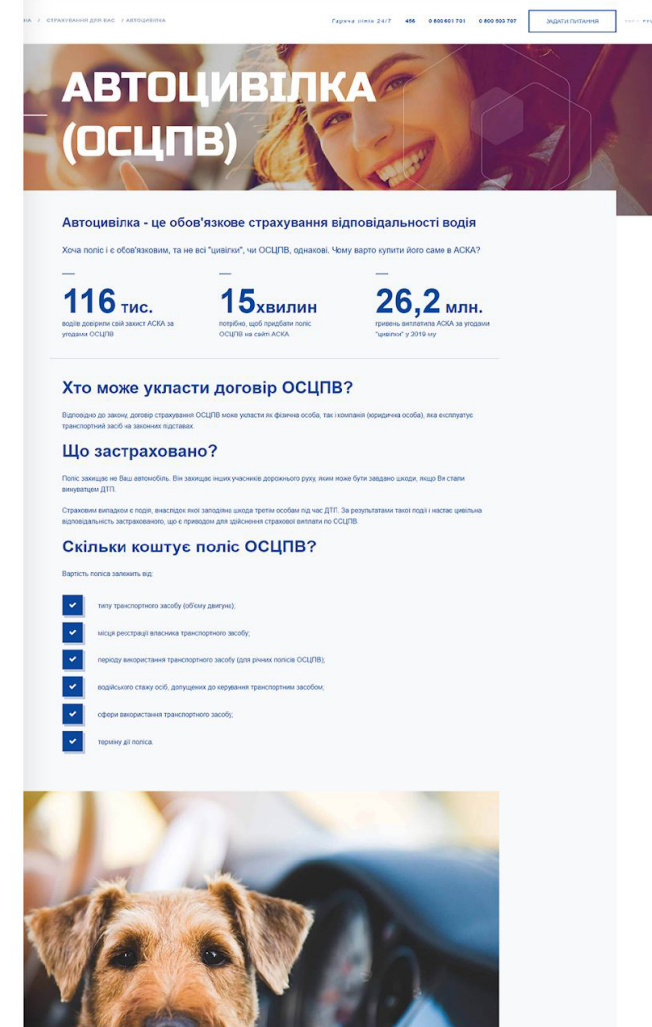

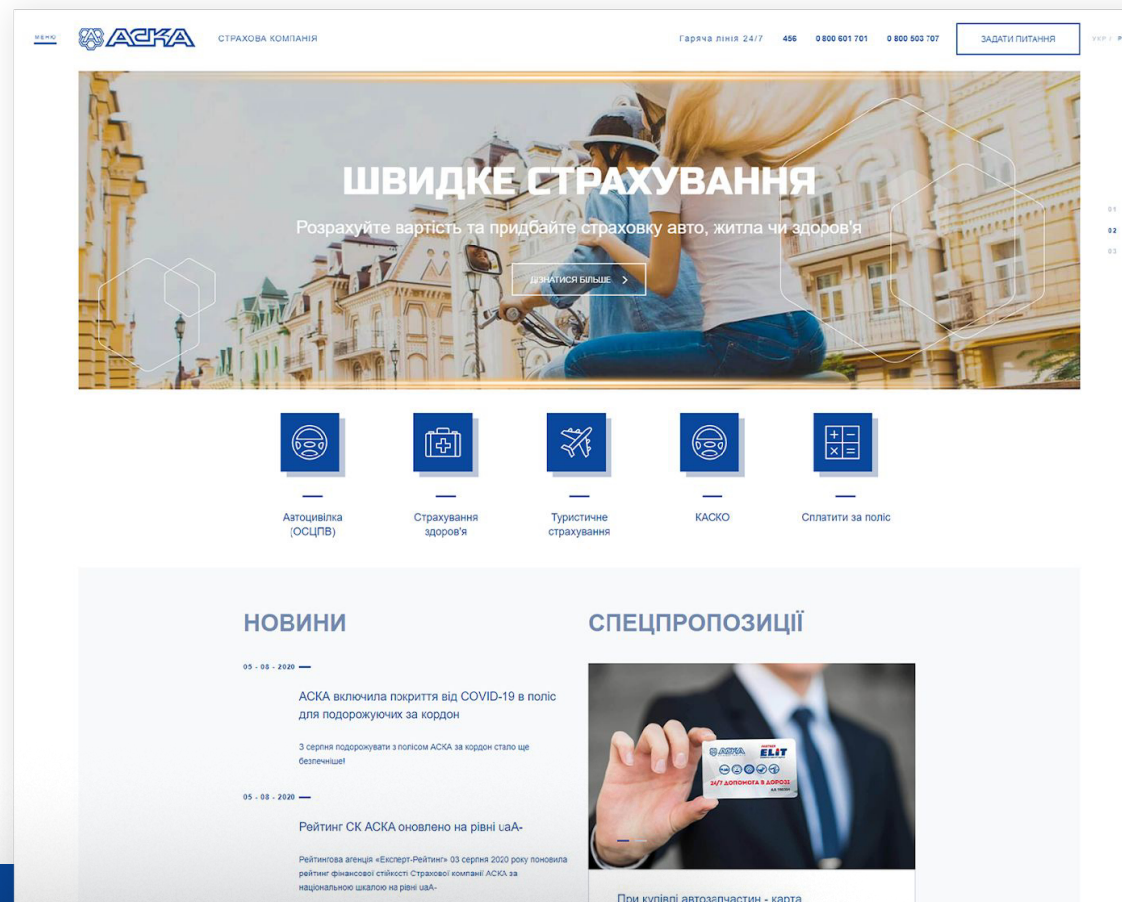

ЗАВЖДИ
Є ПЛАН **Б**

Personal cabinet for the clients of the microfinance company with wide possibilities of work with their contracts: two-factor access, safe work with their obligations and payments, actual information on the proposals and personalized offers.

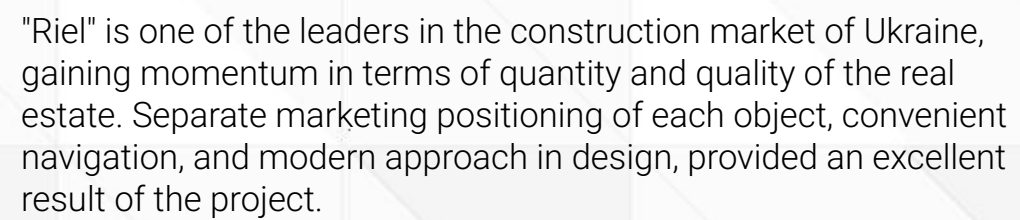

The website we created earlier for ASKA insurance company has been updated. Online ordering insurance products from the site has become fast and convenient. The project we developed won the prestigious Web Awards Ua! The client has received a powerful impulse of business development.

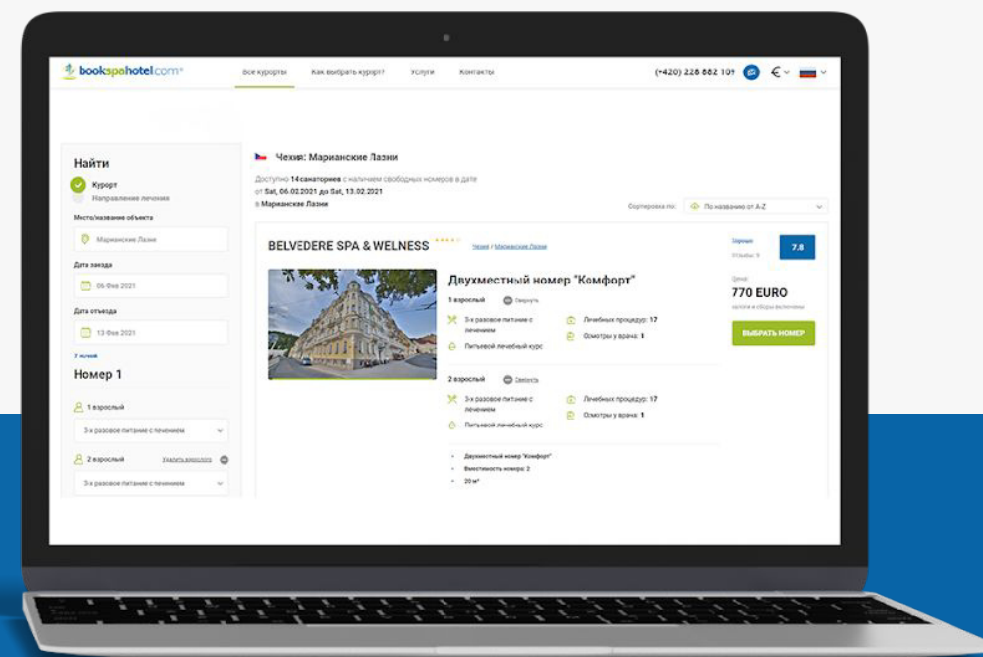

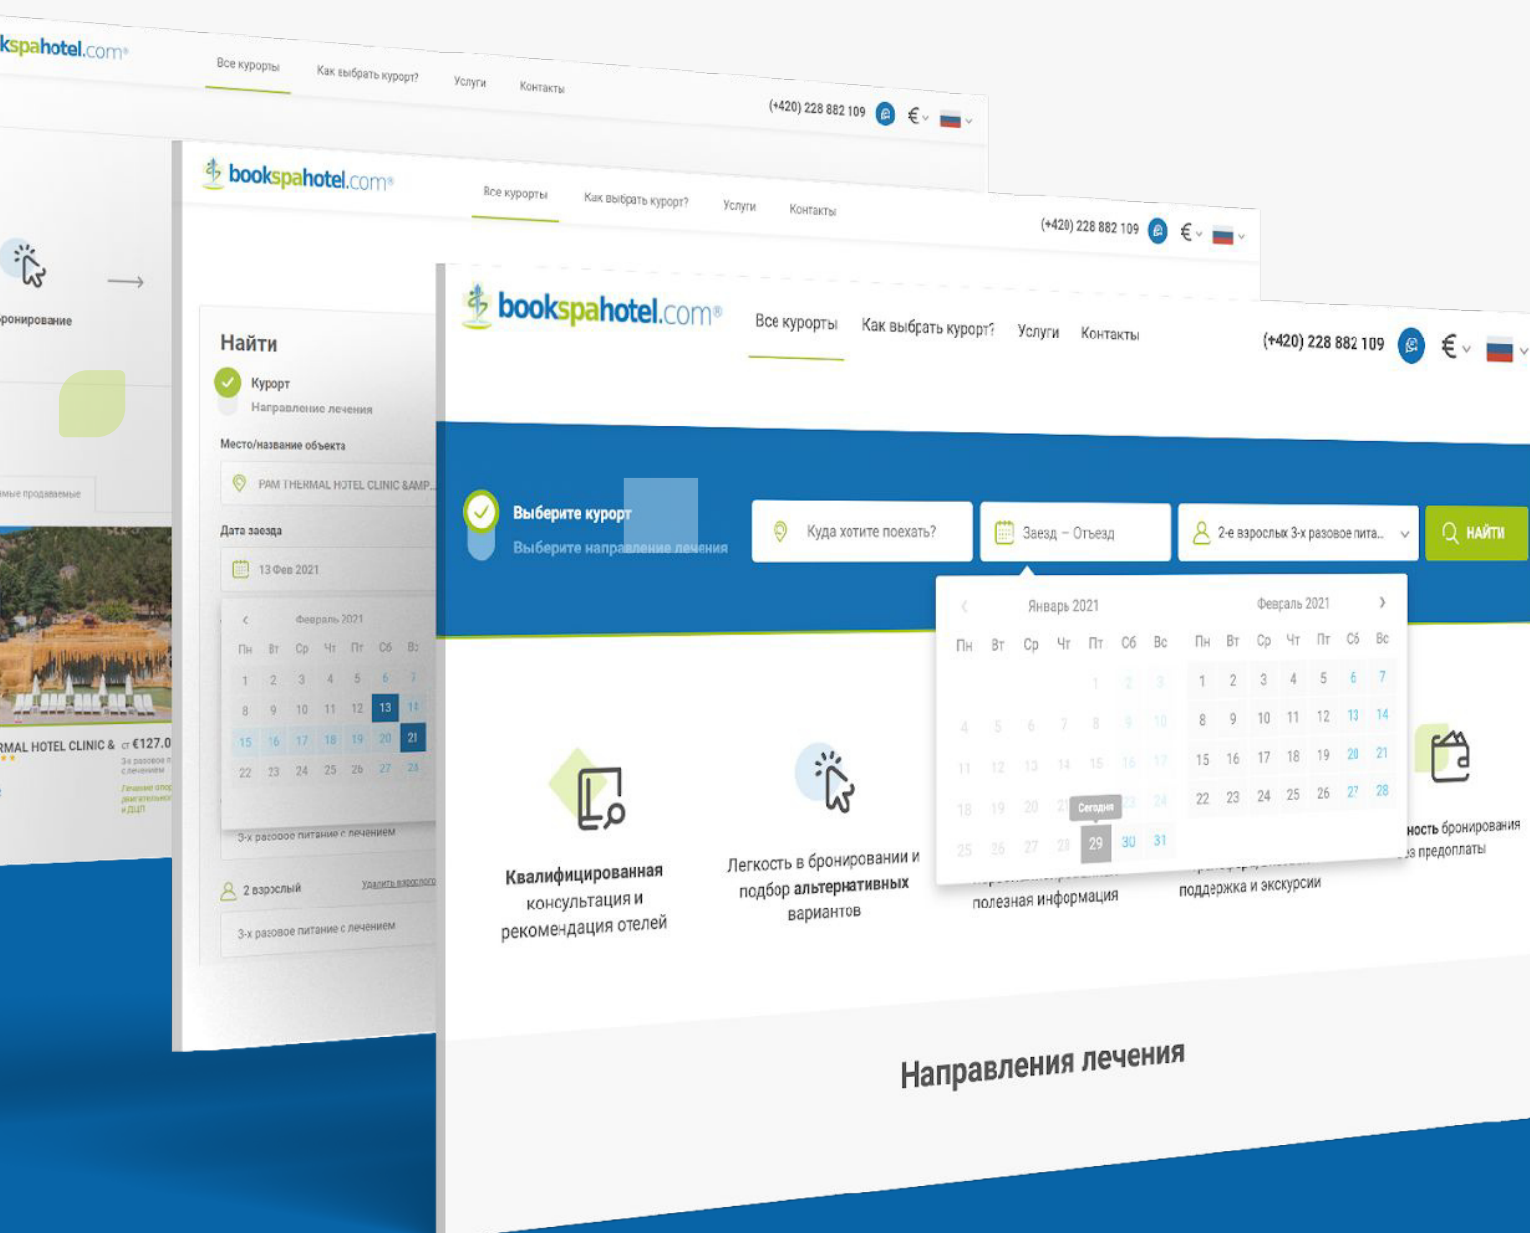

The corporate site of the group of engineering companies specialized in a complex arrangement of high-tech engineering systems in different purposes buildings.

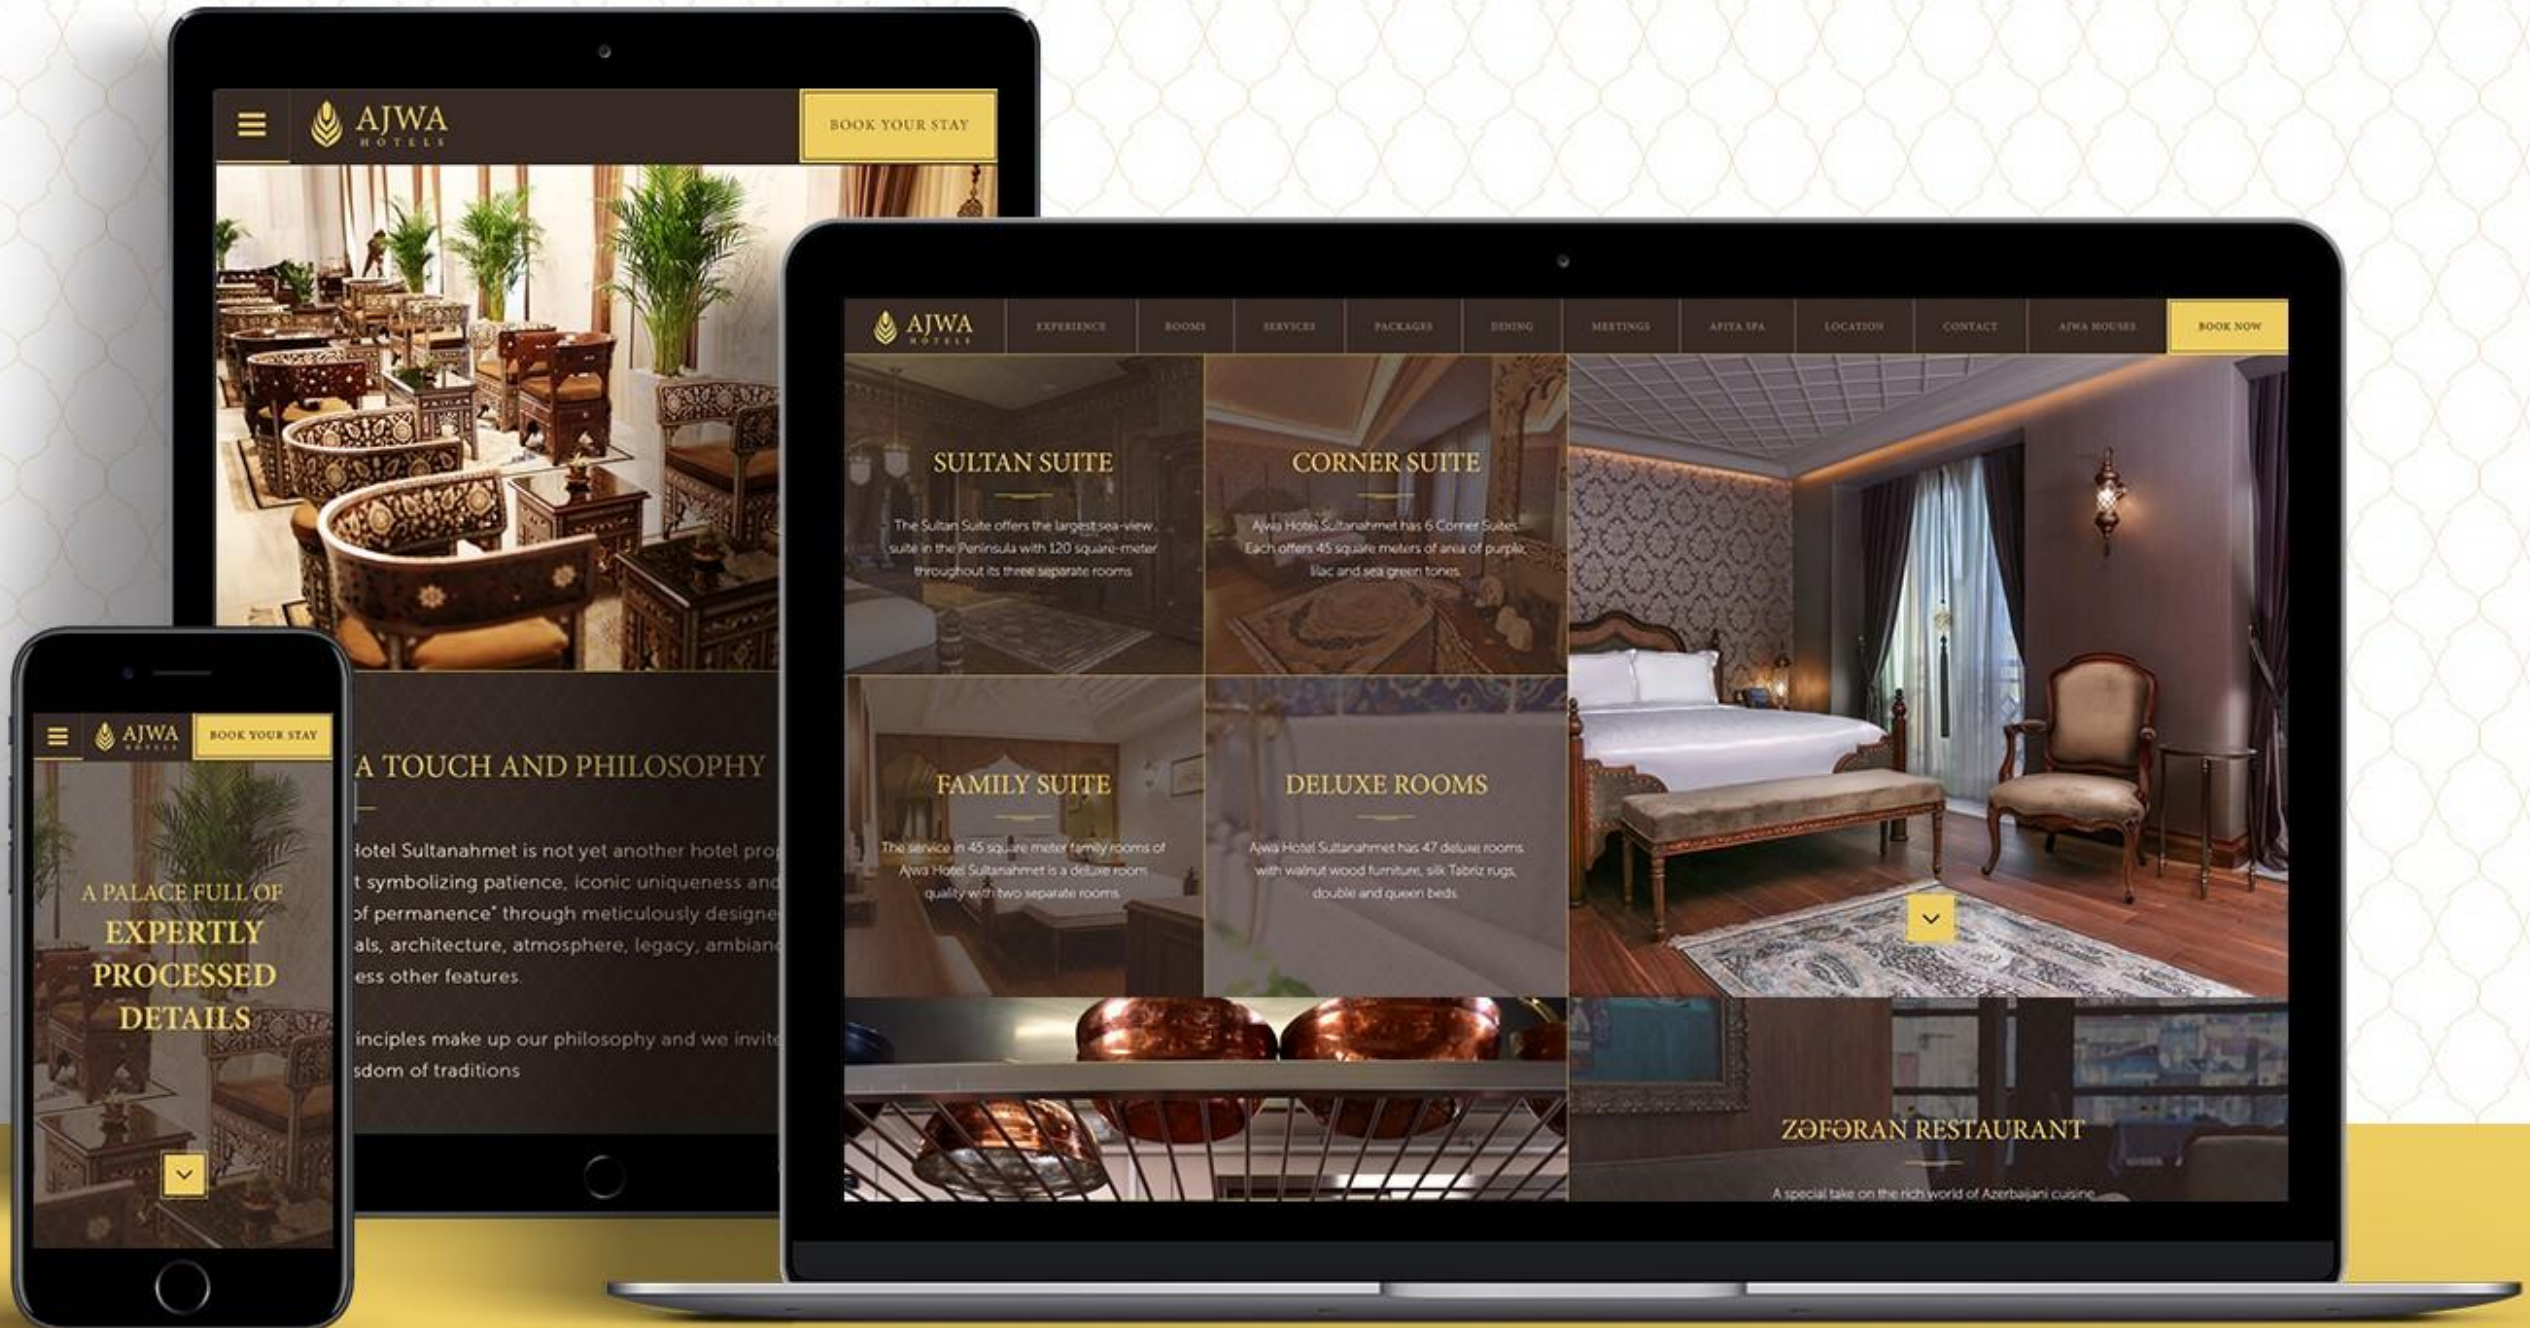

BookSpaHotel is an online service for sanatorium reservations. We created a marketing strategy, made an updated UX design and scripts for the target audience, created an effective design, frontend, backend, and necessary integrations with external systems.

The site of AJWA, a five-star hotel complex in Istanbul. Adaptive design and video, a comfortable system of booking, and site navigation make the project different from the other hotels by its exclusivity.

Website development with modern design for our partner, specialized marketing agency iMark, which covers companies in the areas of industrial production, insurance, finance, as well as personal services.

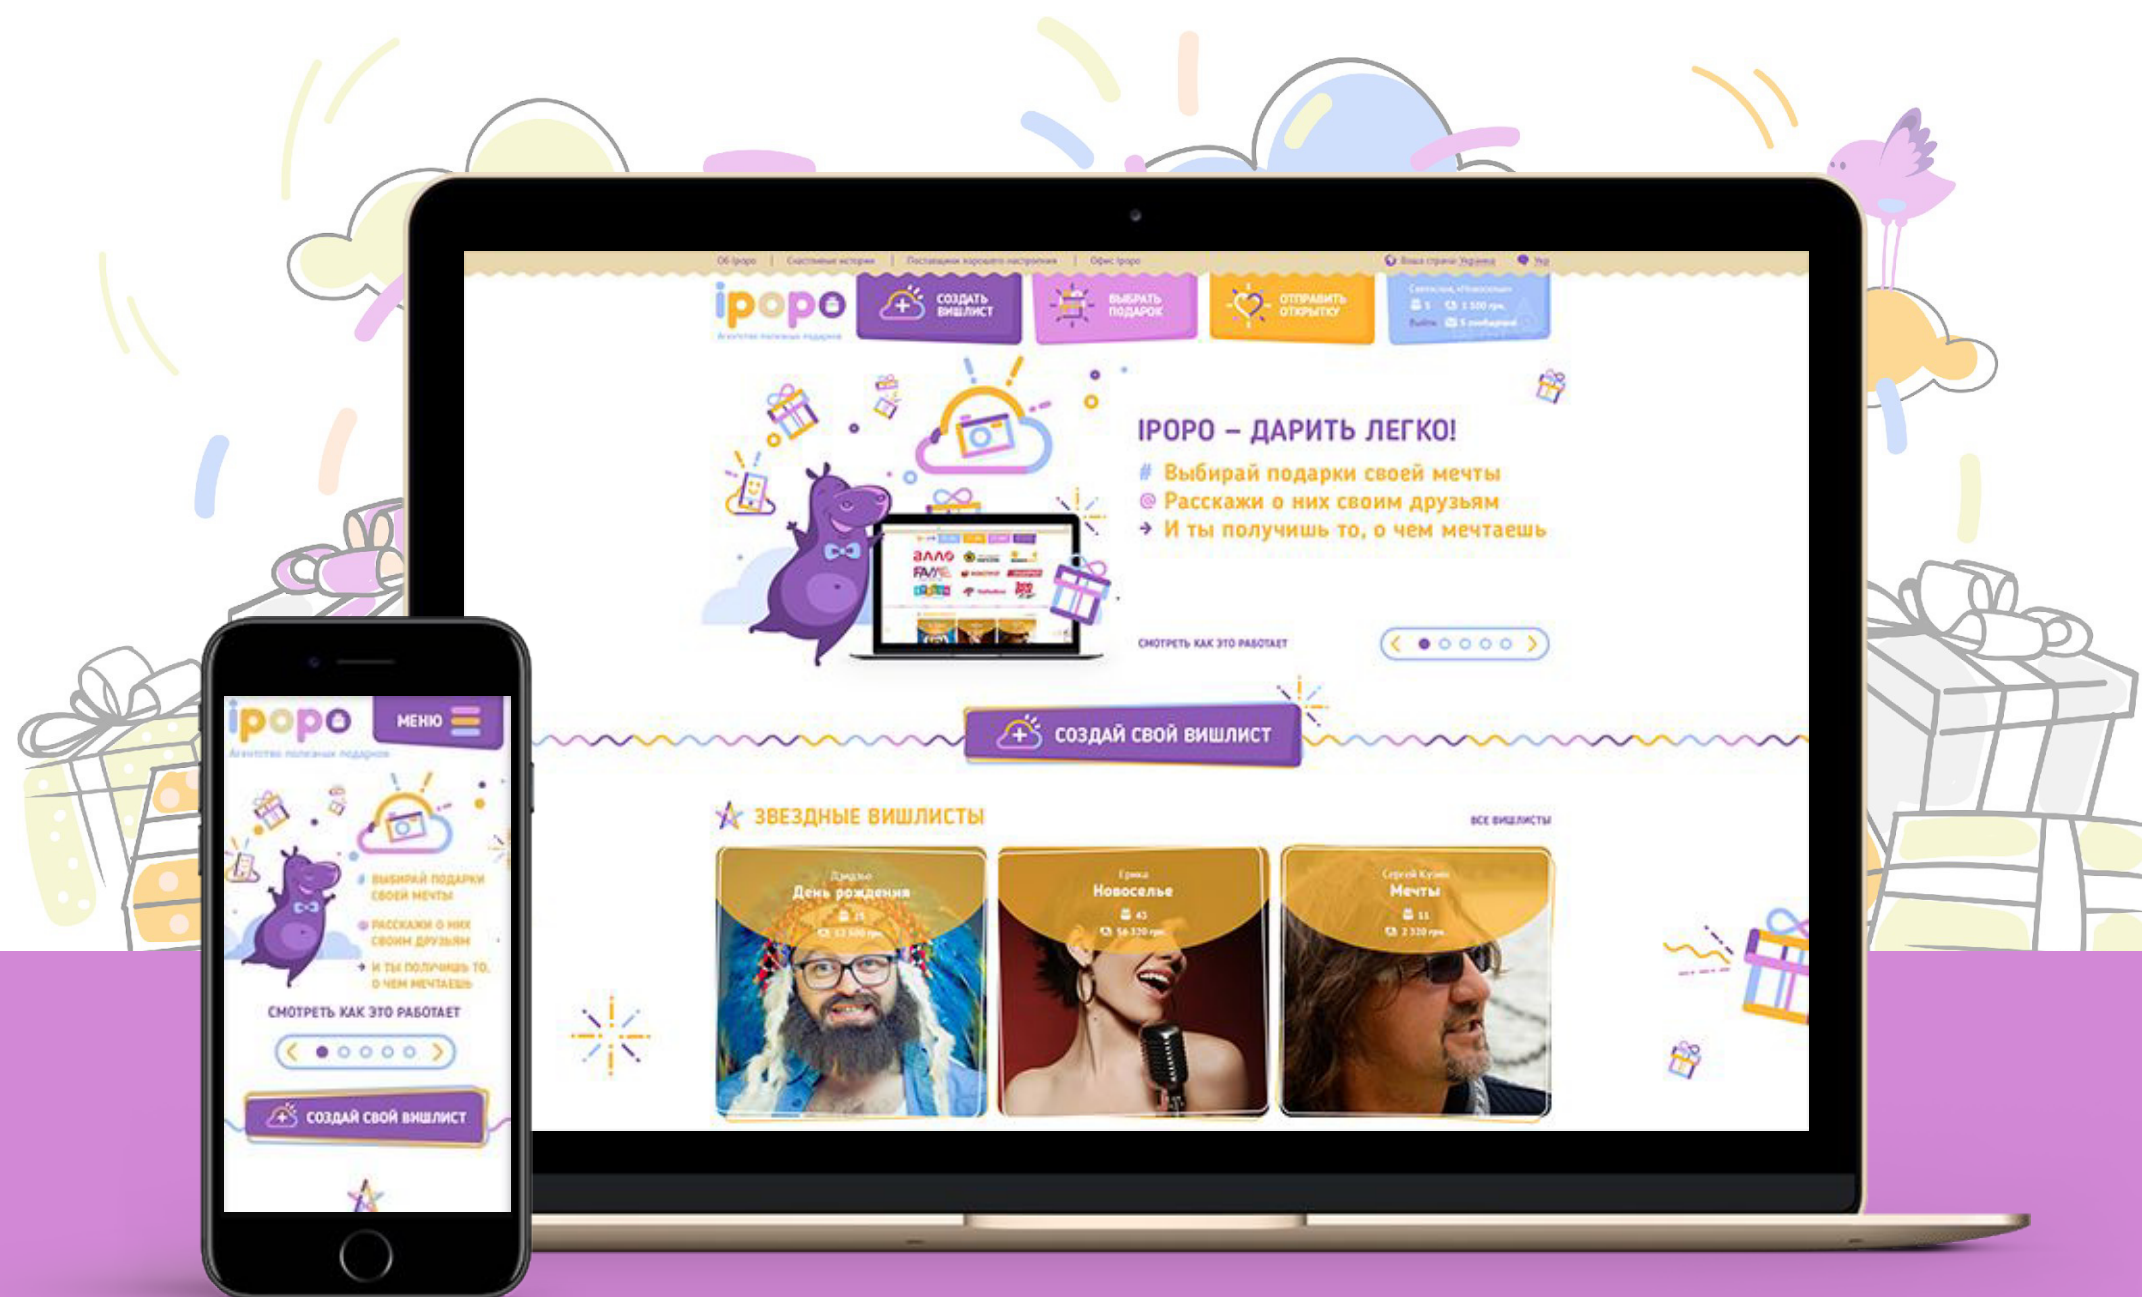

ФРУКТОВИЦЯ

Fruktovitsa™ promo-site is created using a specially developed and shot advertising video sequence. An attractive video sequence combined with a new trademark products catalog demonstrates hard liquors based on unique recipes adapted for modern production by "Galicia Distillery" technologists. That is why "Fruktovitsa"™ has become a recovery of the Ukrainian tradition of hard liquor distillation based on fruit.

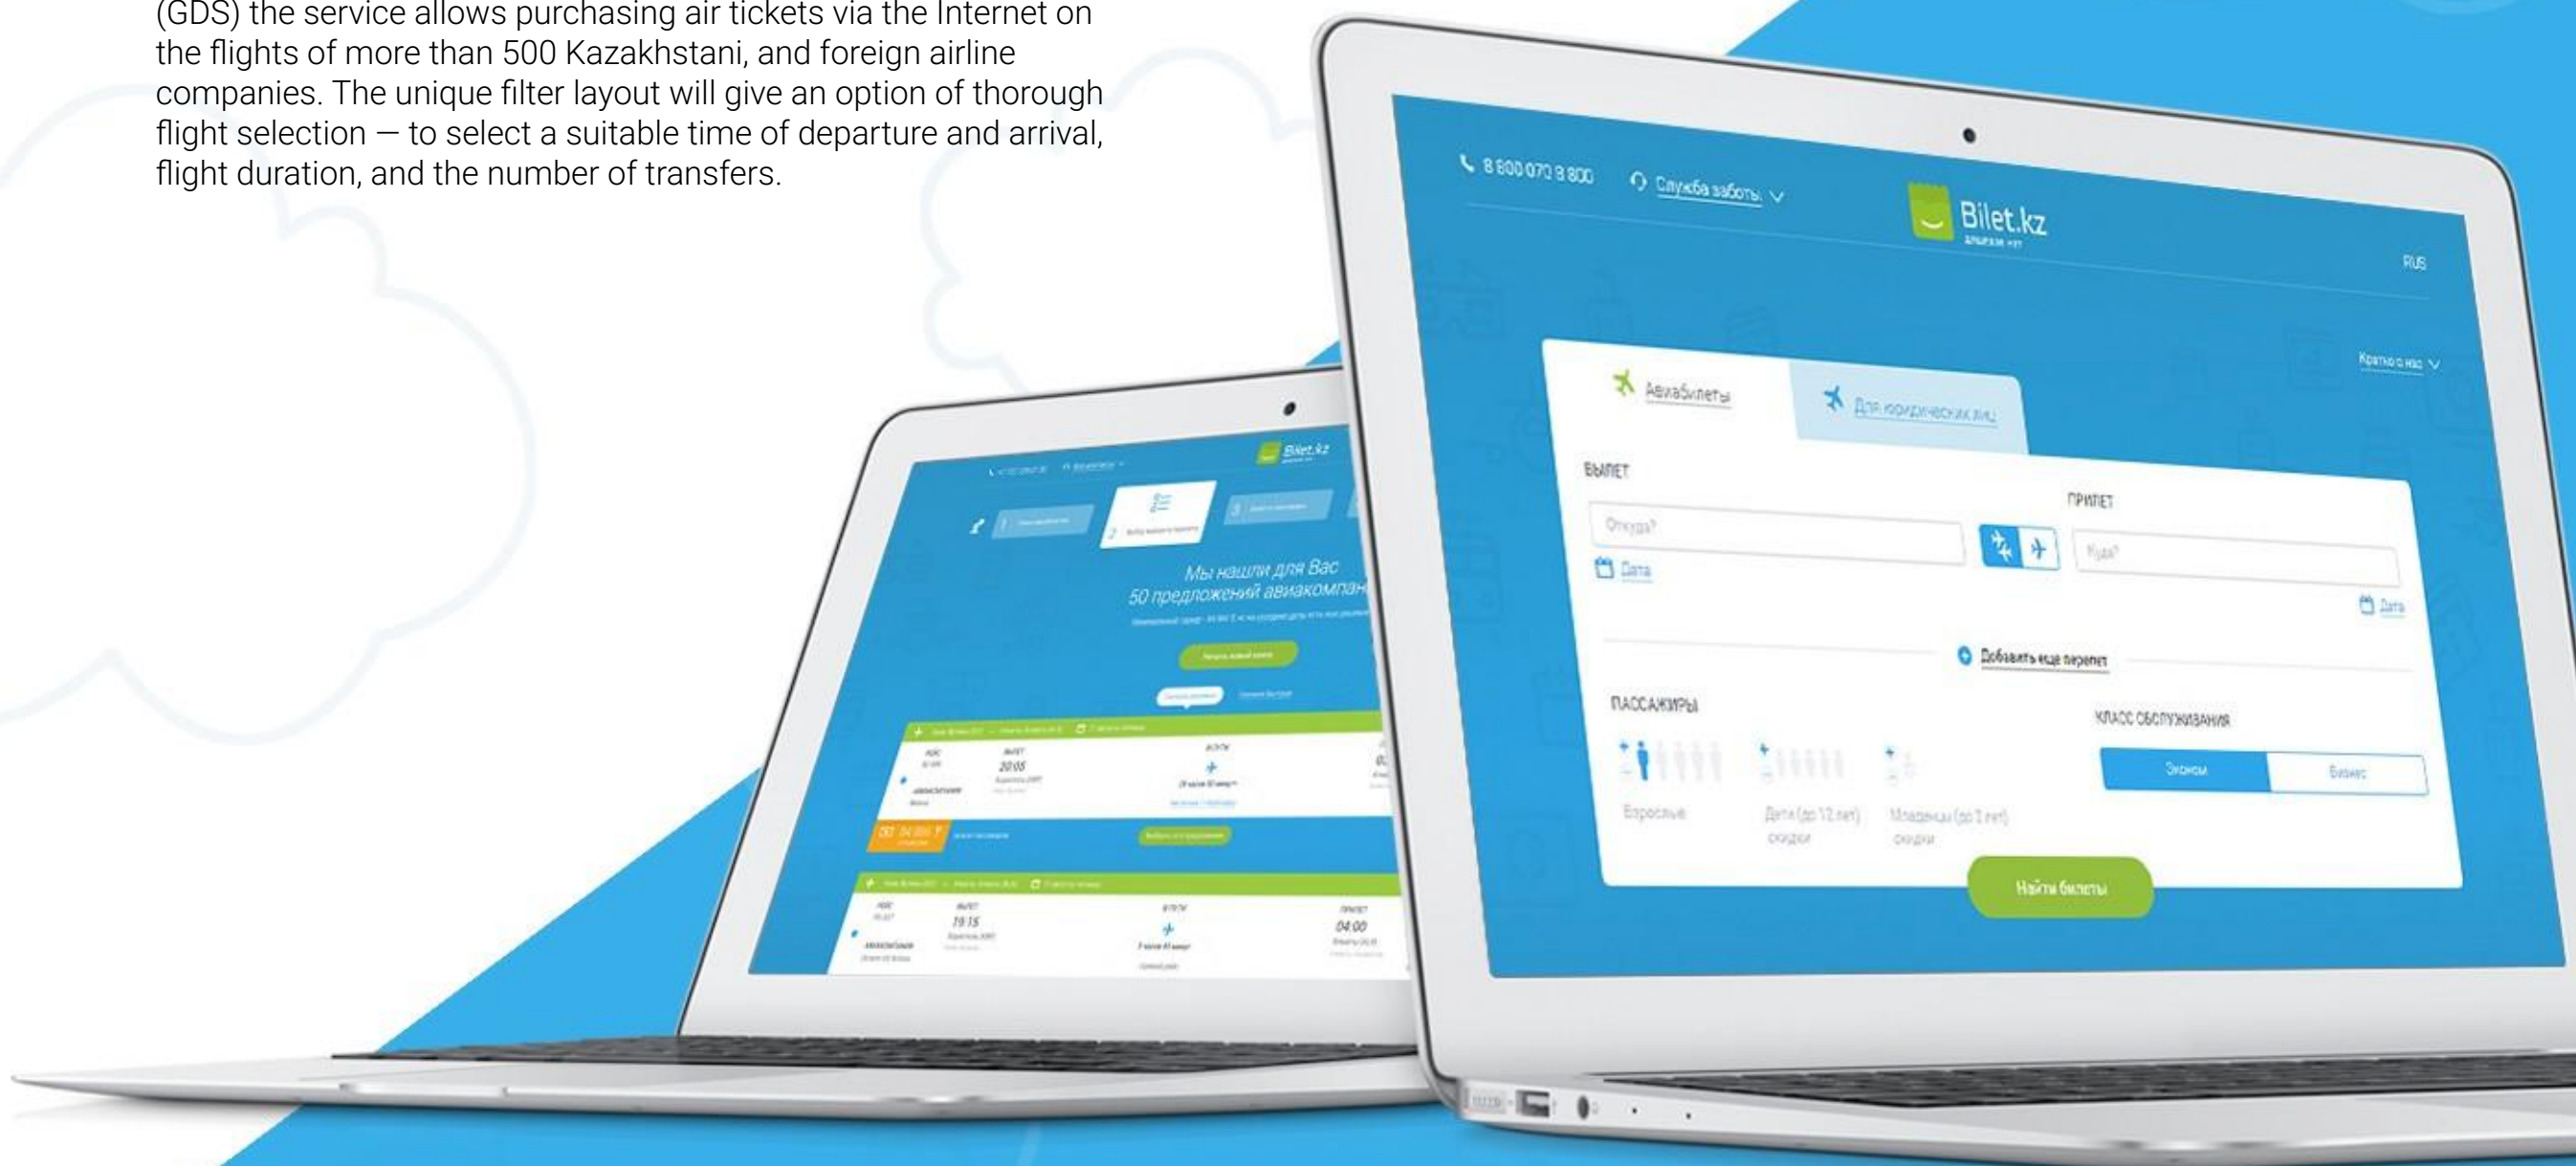

Your friends and relatives will give the gifts of your choice quickly and with great pleasure! We designed and developed the mechanisms of the wishlist, integration with the partners' shops, and the application for social networking websites. The site won the Best Ru.Net Site Competition.

Bilet.kz service enables to purchase of electronic air tickets online. Due to integration into contemporary reservation systems (GDS) the service allows purchasing air tickets via the Internet on the flights of more than 500 Kazakhstani, and foreign airline companies. The unique filter layout will give an option of thorough flight selection — to select a suitable time of departure and arrival, flight duration, and the number of transfers.

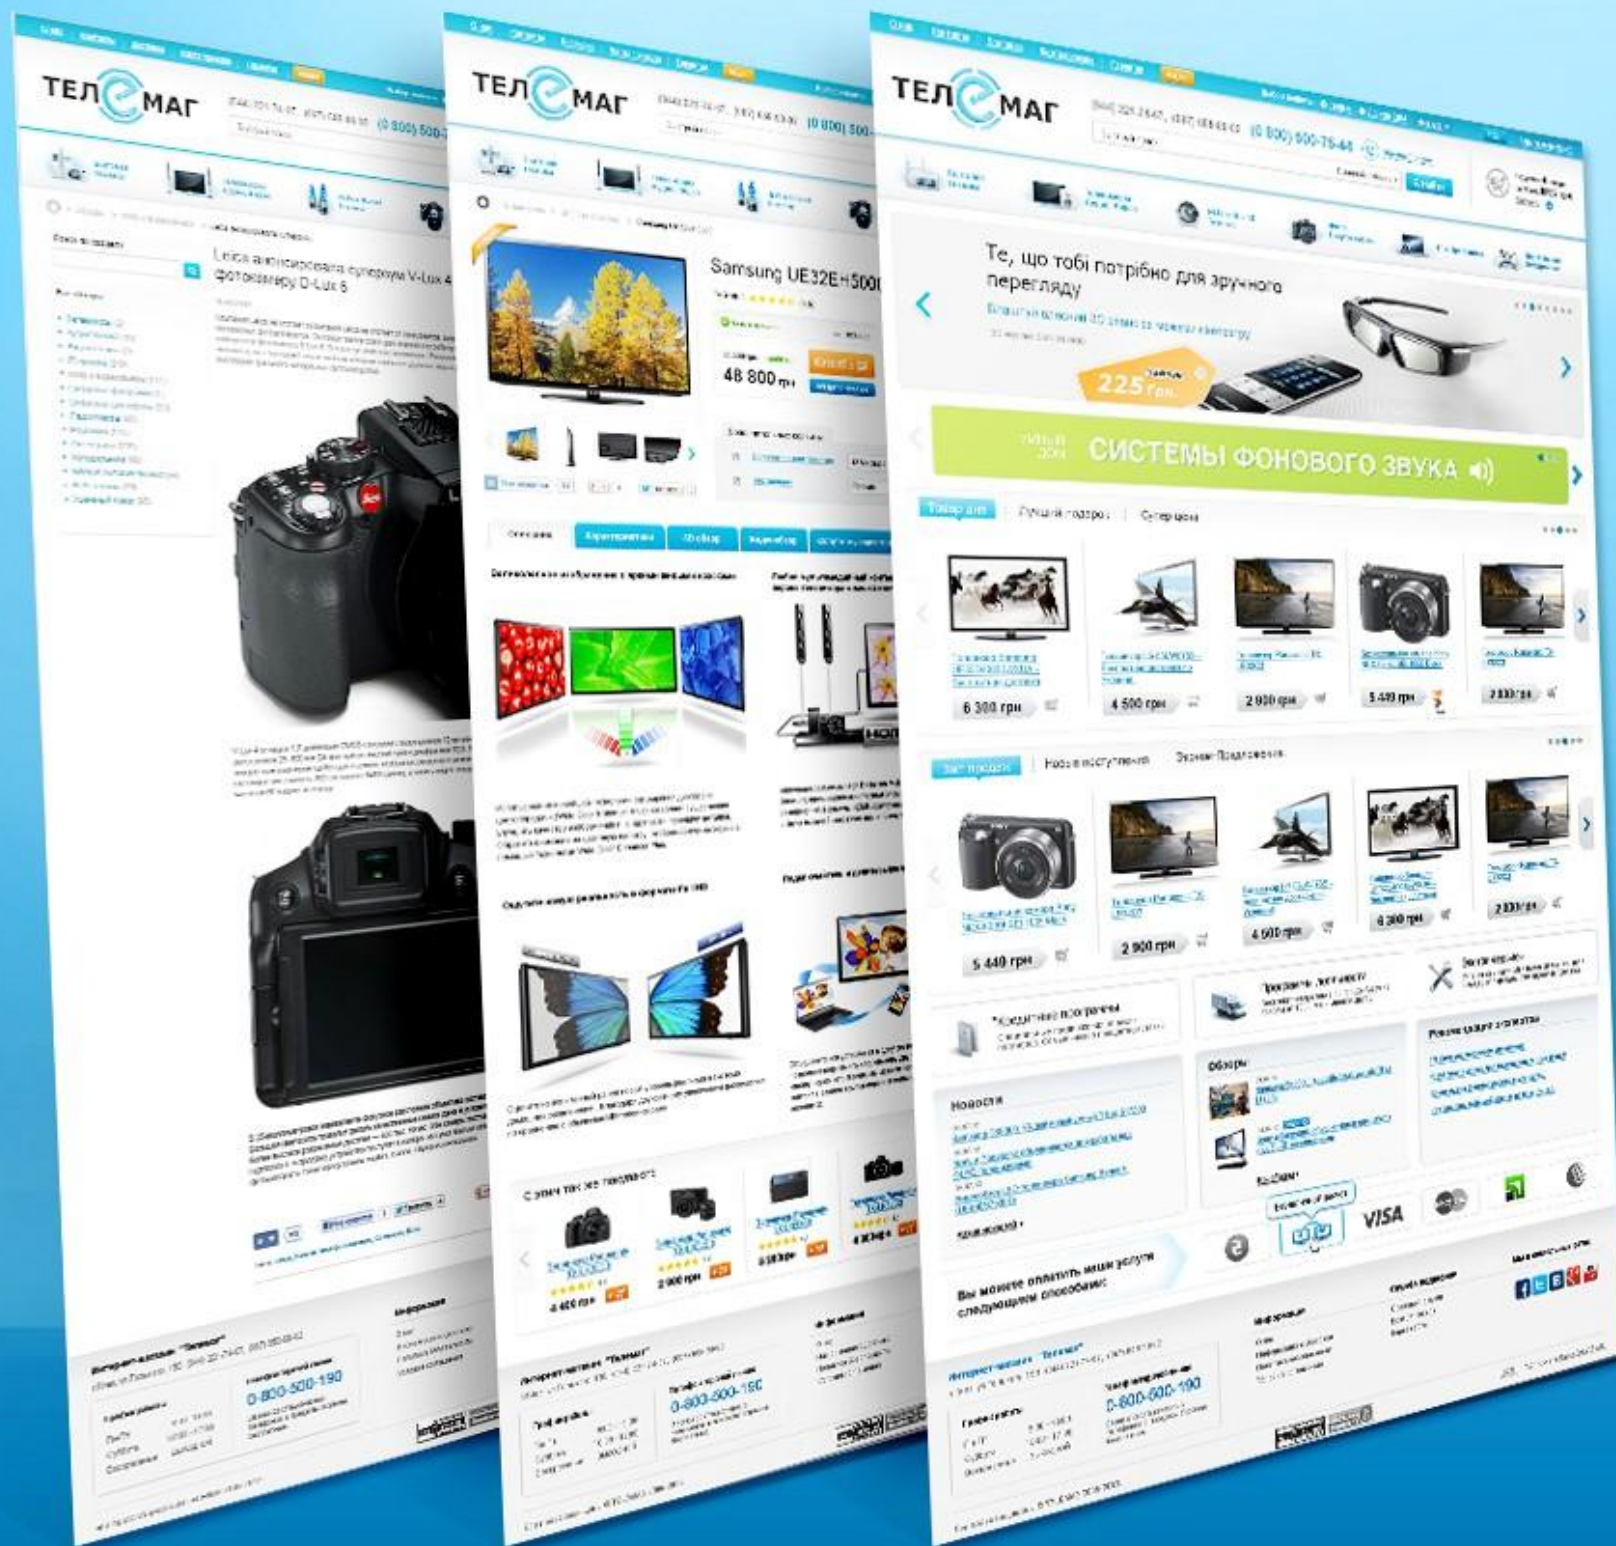

Our main task was to perform a complete technological and graphic upgrade of Imexbank's existing corporate website. The objectives of the updated project:

- to increase the time of the user's staying on the site;
- to make the site sections readily understandable and available for each target audience of the project as the bank has a wide variety of services and products which it offers any category of users;
- to increase sales of a range of bank products.

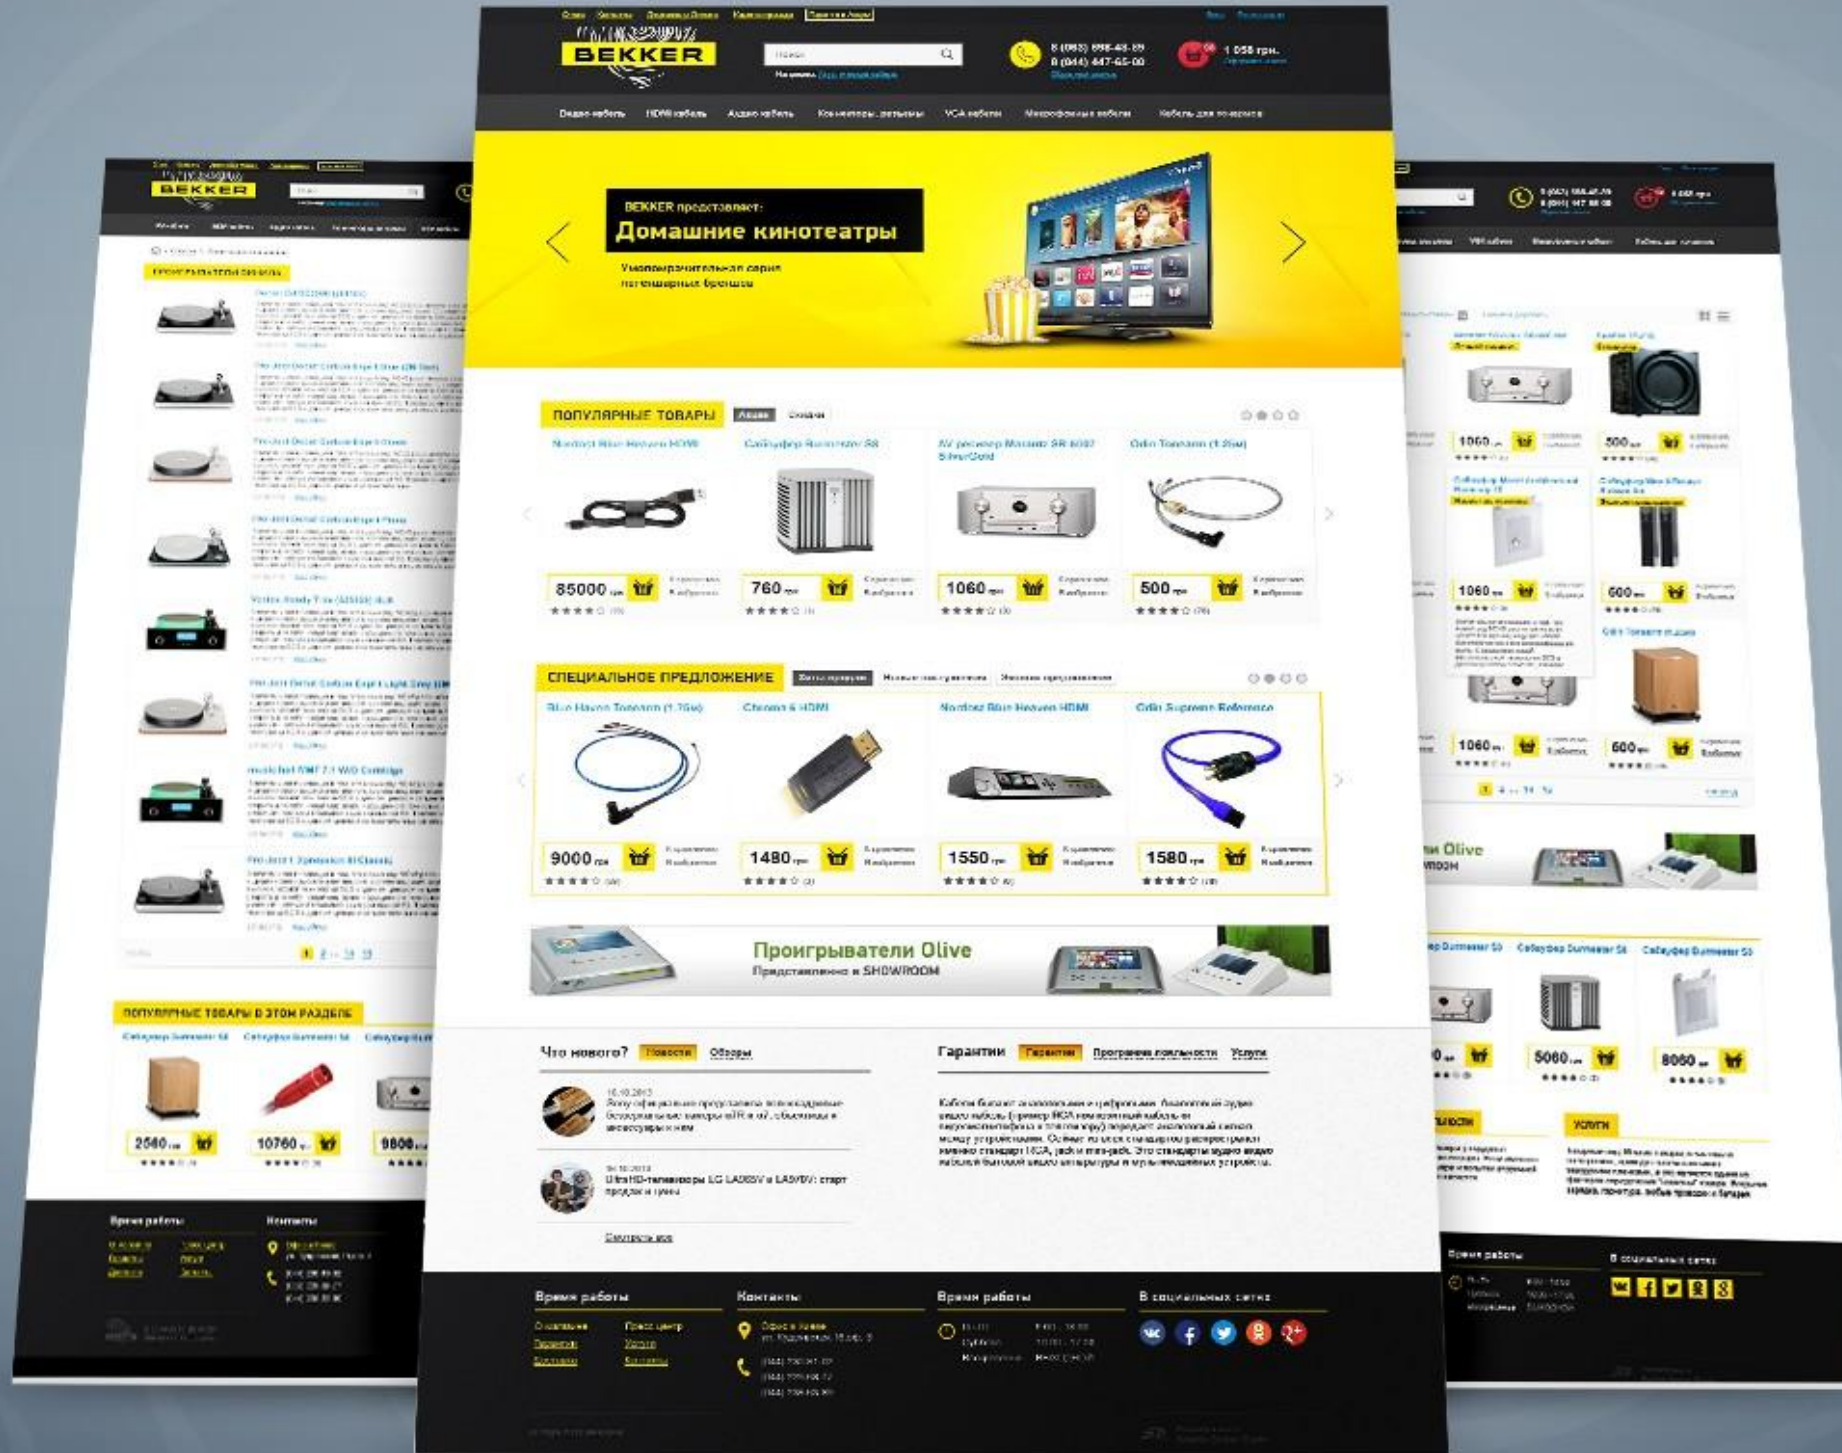

Telemag.ua, an online shop, is distinct in the detailed elaboration of all interfaces, and elements of business processes. 35 different standard scenarios have been thought out, designed, and implemented. The project is built on our IT-Design DBMS and includes an e-commerce organization system and its integration into all processes of the company.

The online shop specializes in professional audio and video products for home theater systems, stereo systems, karaoke, and smart home. Navigation and the products catalog are created in a view of particular of the target audience of the project – specialists that are fully aware of professional audio and video technologies, know for sure what they want, and have no desire to spend a lot of time searching for what they need.

CreditMarket operates on the Ukrainian retail financial services market and offers simple and suitable credit solutions for its clients. Adjustable calculators, suitable systems of communication with the company, easy-to-understand scenarios make the project one of the best in the financial market.

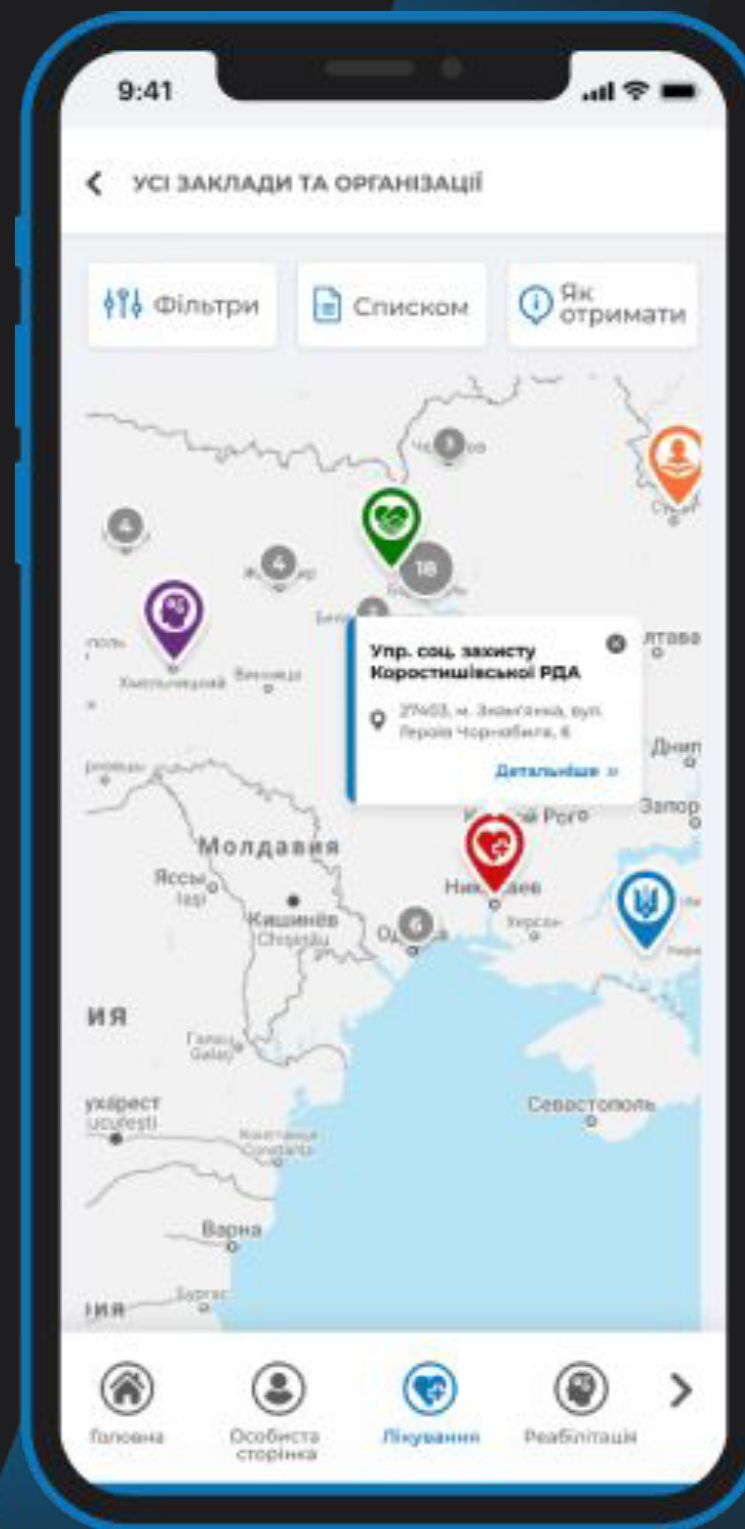

Mobile Applications

More than **40** developed applications

Development of a strict and concise mobile application for the Ministry of Veterans of Ukraine with the support of UNDP, which made life easier for veterans.

BARANOVA 27

The Baranova27 mobile application contains complete information on housing and shelters, humanitarian aid, medical services, job options and support in processing documents by country for internally displaced persons.

Corporate Identity

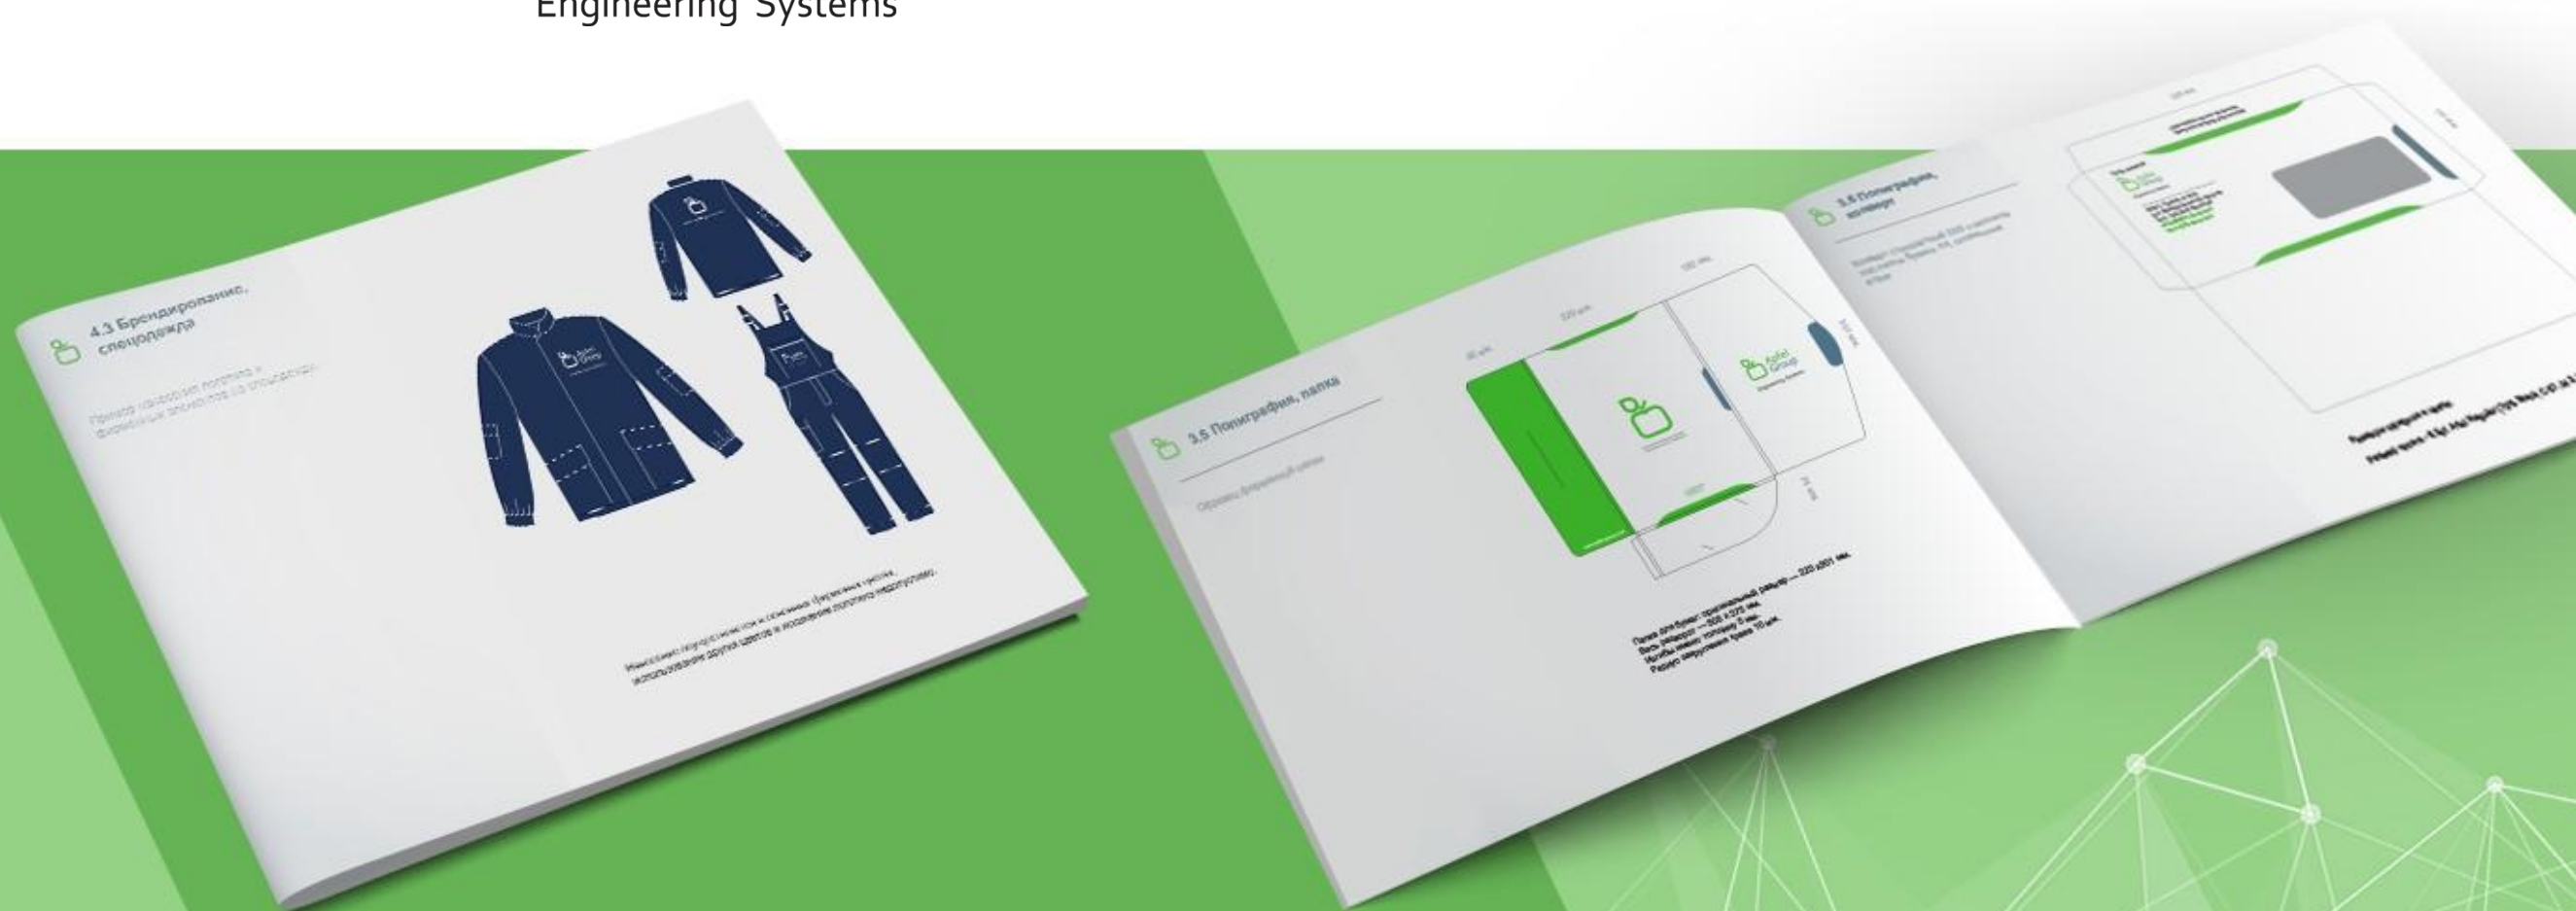

More than **100** developments
of corporate identity for our clients

boo

A modernized vision for the online marketplace with a new corporate identity. A complete redesign of the site was carried out alongside development of a new company logo, creating a more attractive look for both partners and users.

We renamed and completely re-branded the engineering company. The brand book and the full set of documents for digital activities were developed.

Air tickets reservation service became user-friendly. It became closer and more understandable for users due to corporate identity style.

For the new brand of building and facing materials Apfel Group has developed a logo, which blends with the corporate identity of the company, and Guideline with a detailed technical description and tips for use.

A series of logo variations for KIONICA arranged diagonally. From top to bottom: a small square icon, the word 'Kionica' in a black serif font with a circular knot icon, a square icon with a stylized leaf, the word 'KIONICA' in a black sans-serif font, and the word 'KIONICA' in a large, bold, dark blue sans-serif font with a green 'K' icon. The background includes a green diagonal band and a faint city skyline at the bottom.

Kionica

KIONICA

KIONICA

A new face of the social research center.

Corporate identity of the IT-company, which values openness and transparency in relations with the clients.

Graphic Design

More than **500** projects performed

Development of colorful illustrations for the Tamagotchi mobile game for the brand "Divo"

Ipopo, a cheerful and kind character for gift service and wishlists.

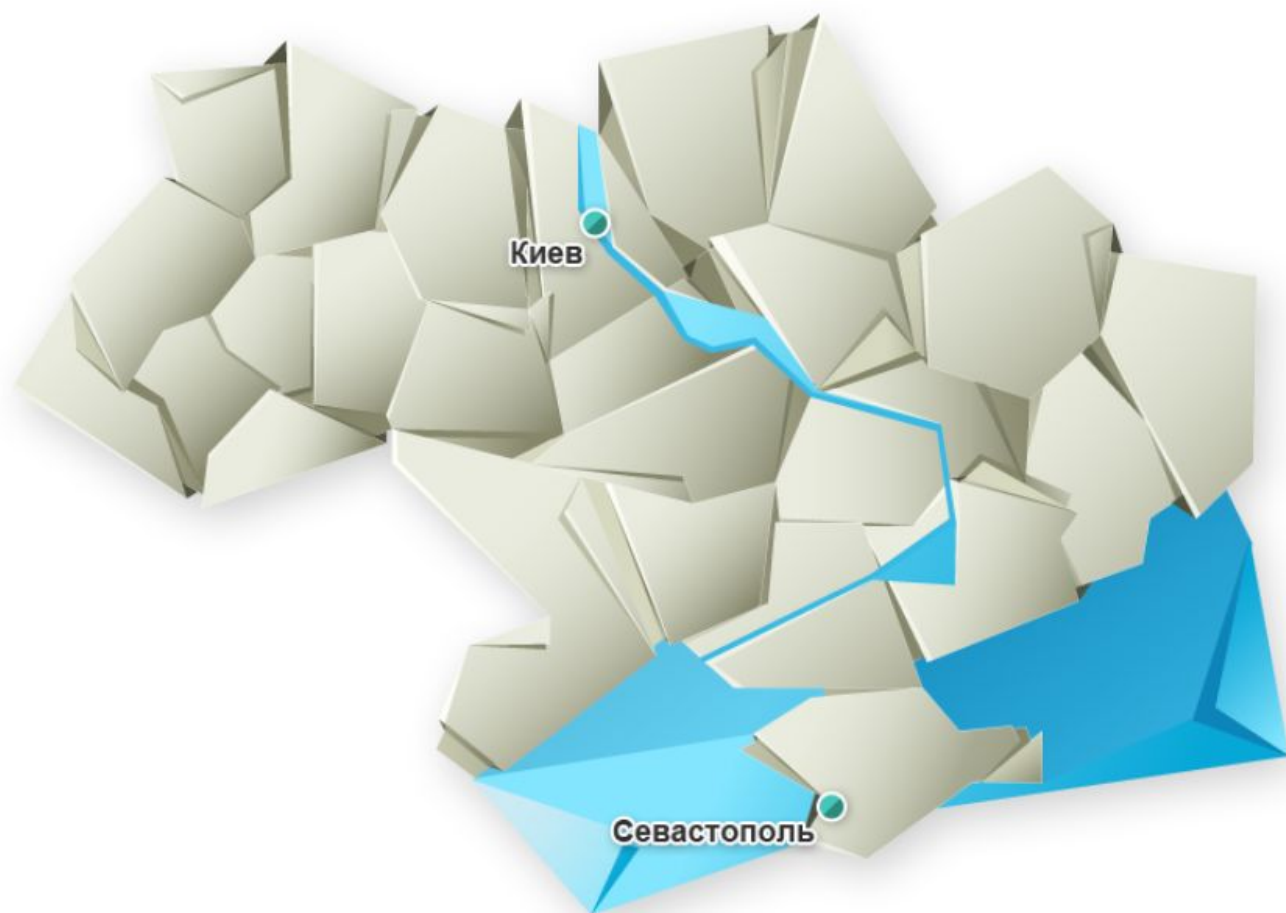

Implementation of 3D-models in a form of illustrations for ASKA insurance company website.

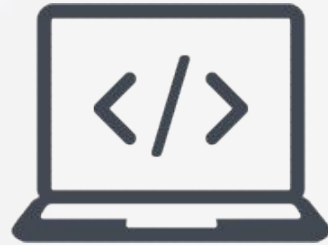

Style and illustrations for the project 'Competitive Ukraine' and interface elements.

Rénage

Visualization of 3D models for the promotional website of the brand of elite cognacs Renage, it's a cognac that prides itself on steadfast adherence to the classic technology of distillation cognac spirits. We prepared the ideas and implemented the subsequent rendering.

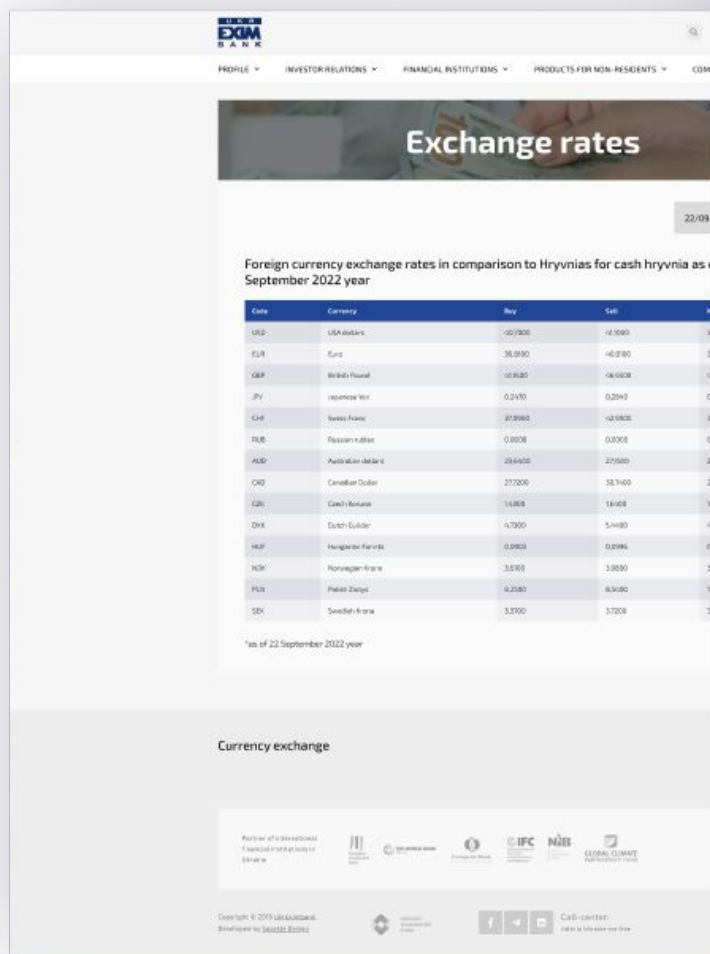

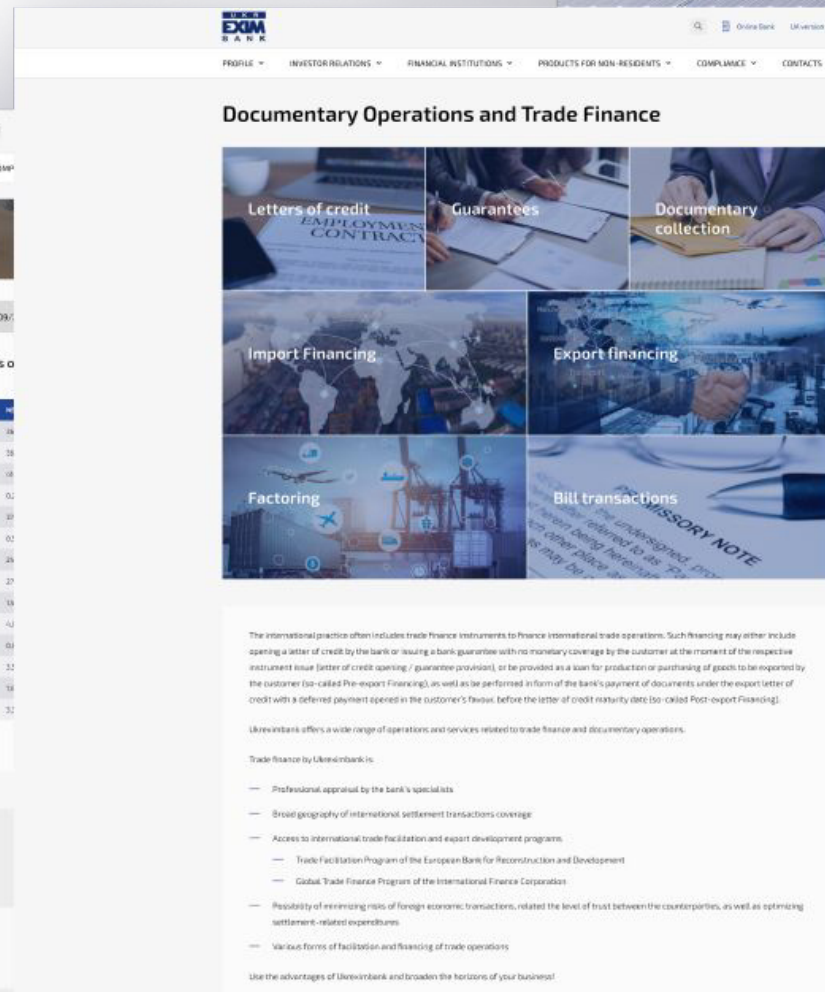

Software Development

More than **40** developments of individual projects

Corporate site for state export-import Bank of Ukraine

Project tasks:

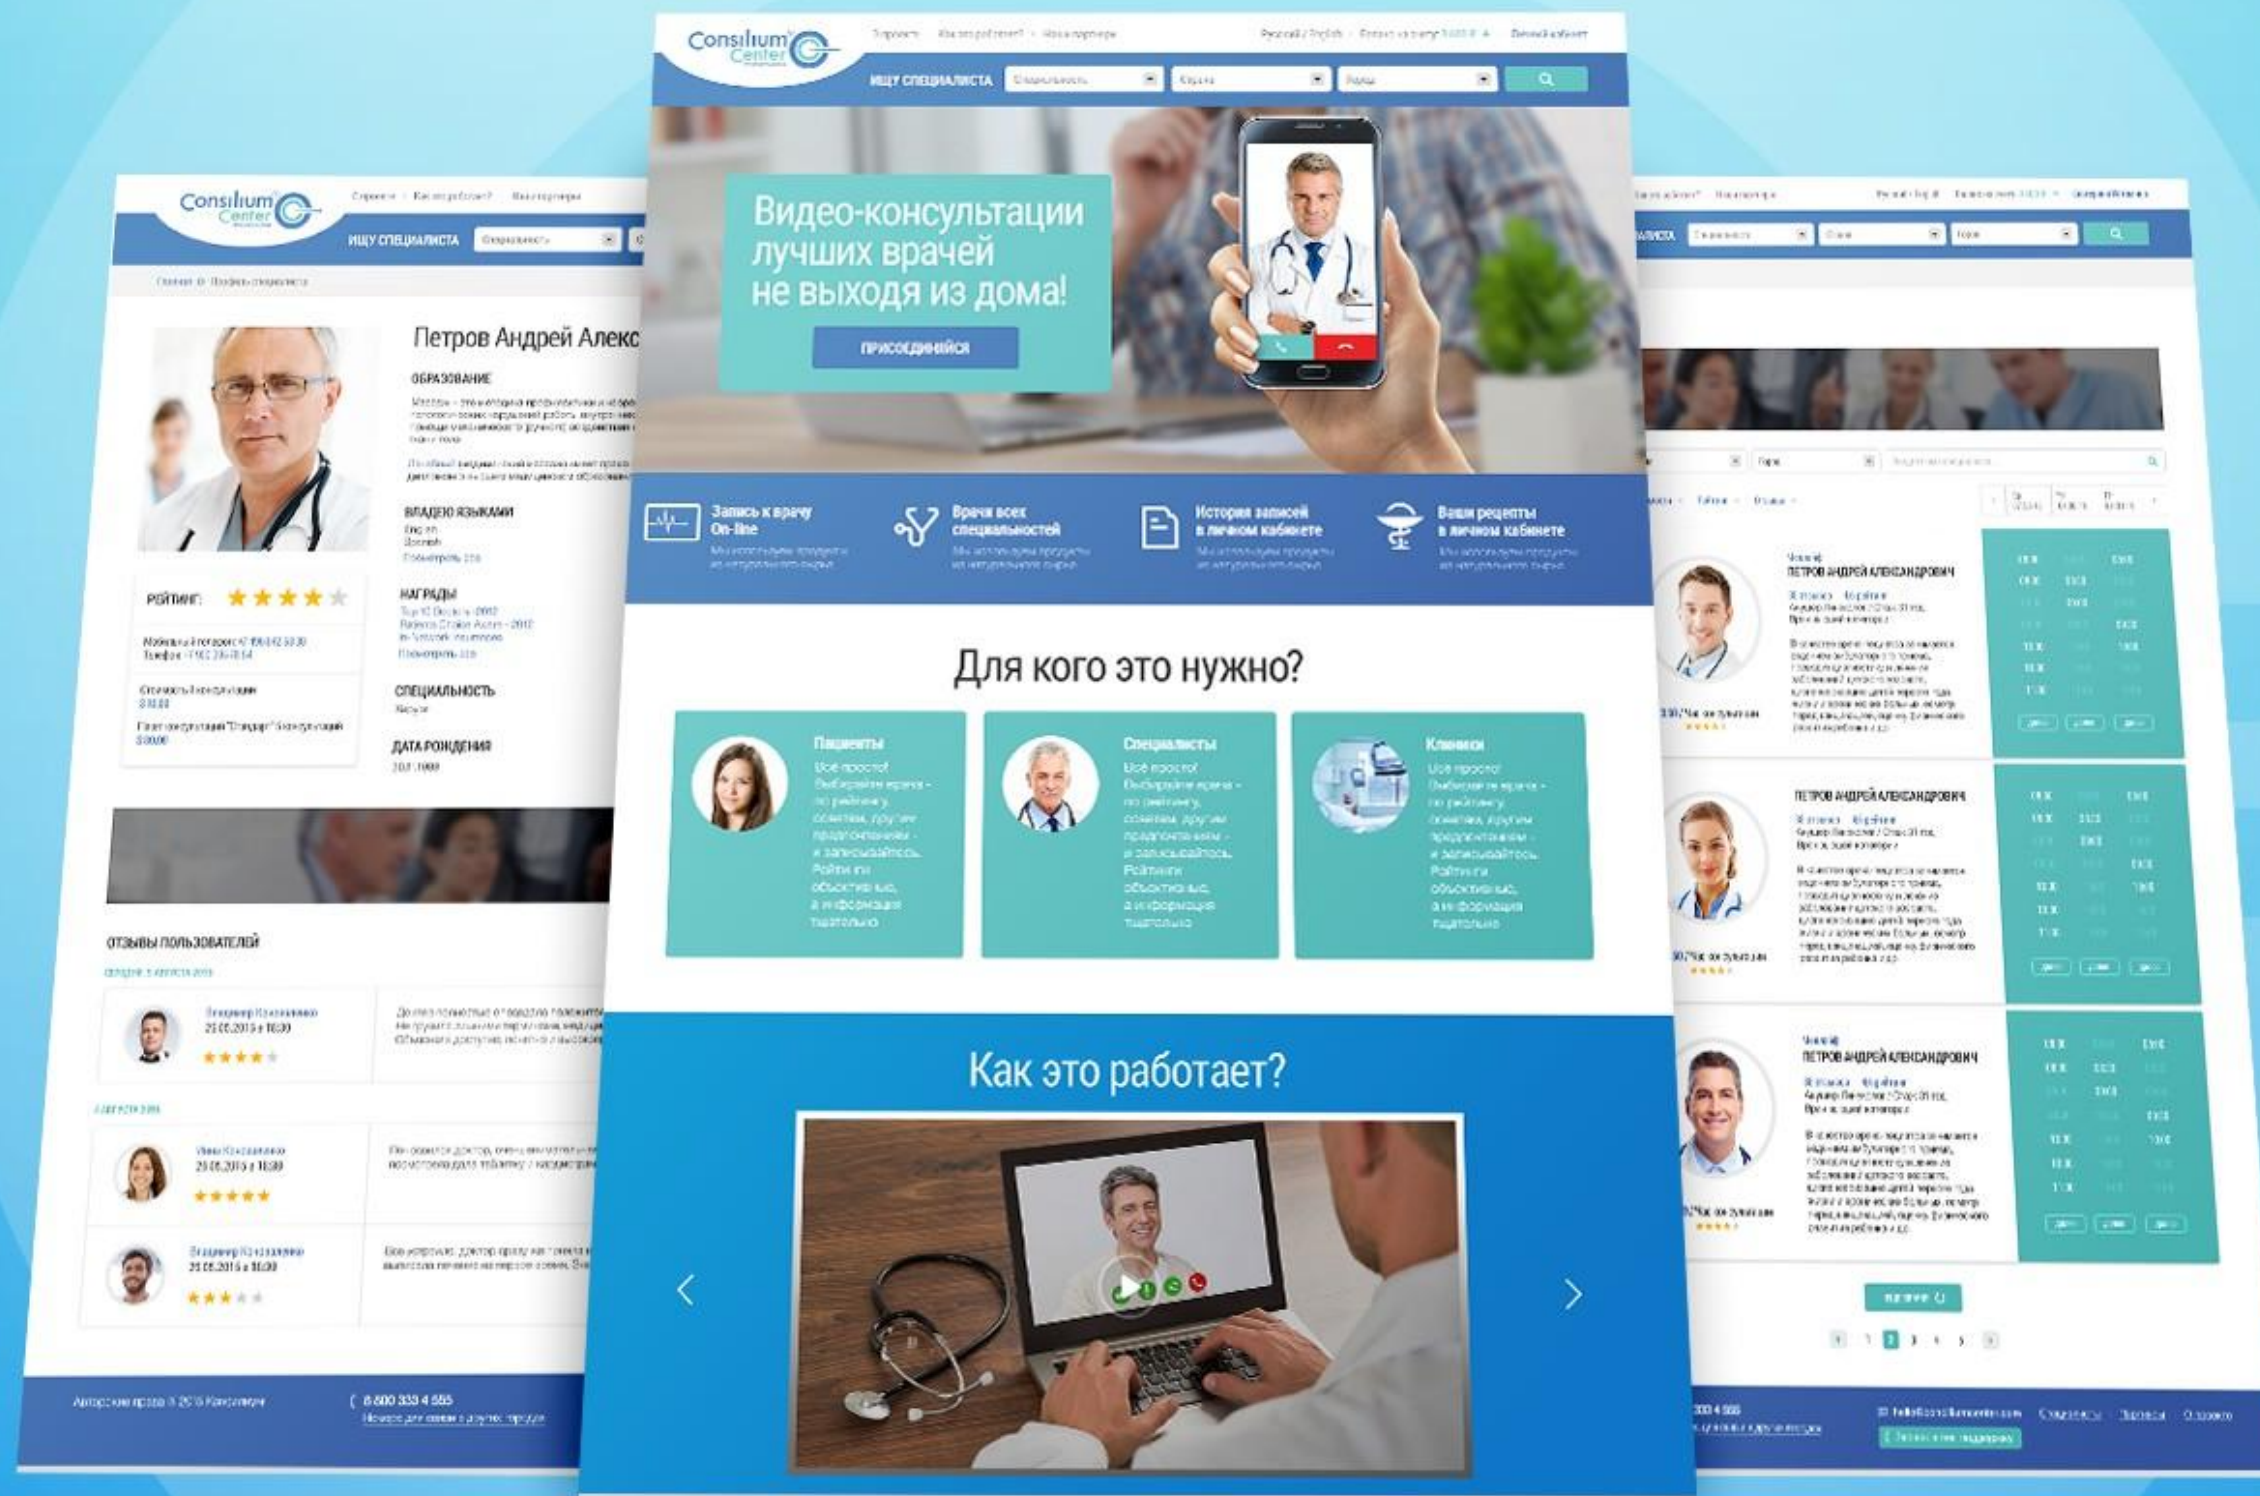

- To implement the redesign of the website
- To develop the inner constructor of pages

Portal for video consulting of the patient with doctors.

Project tasks:

- to create a suitable video platform for the patient's communication with doctors;
- to solve the problem with placement, and transfer of high volumes of information between participants.

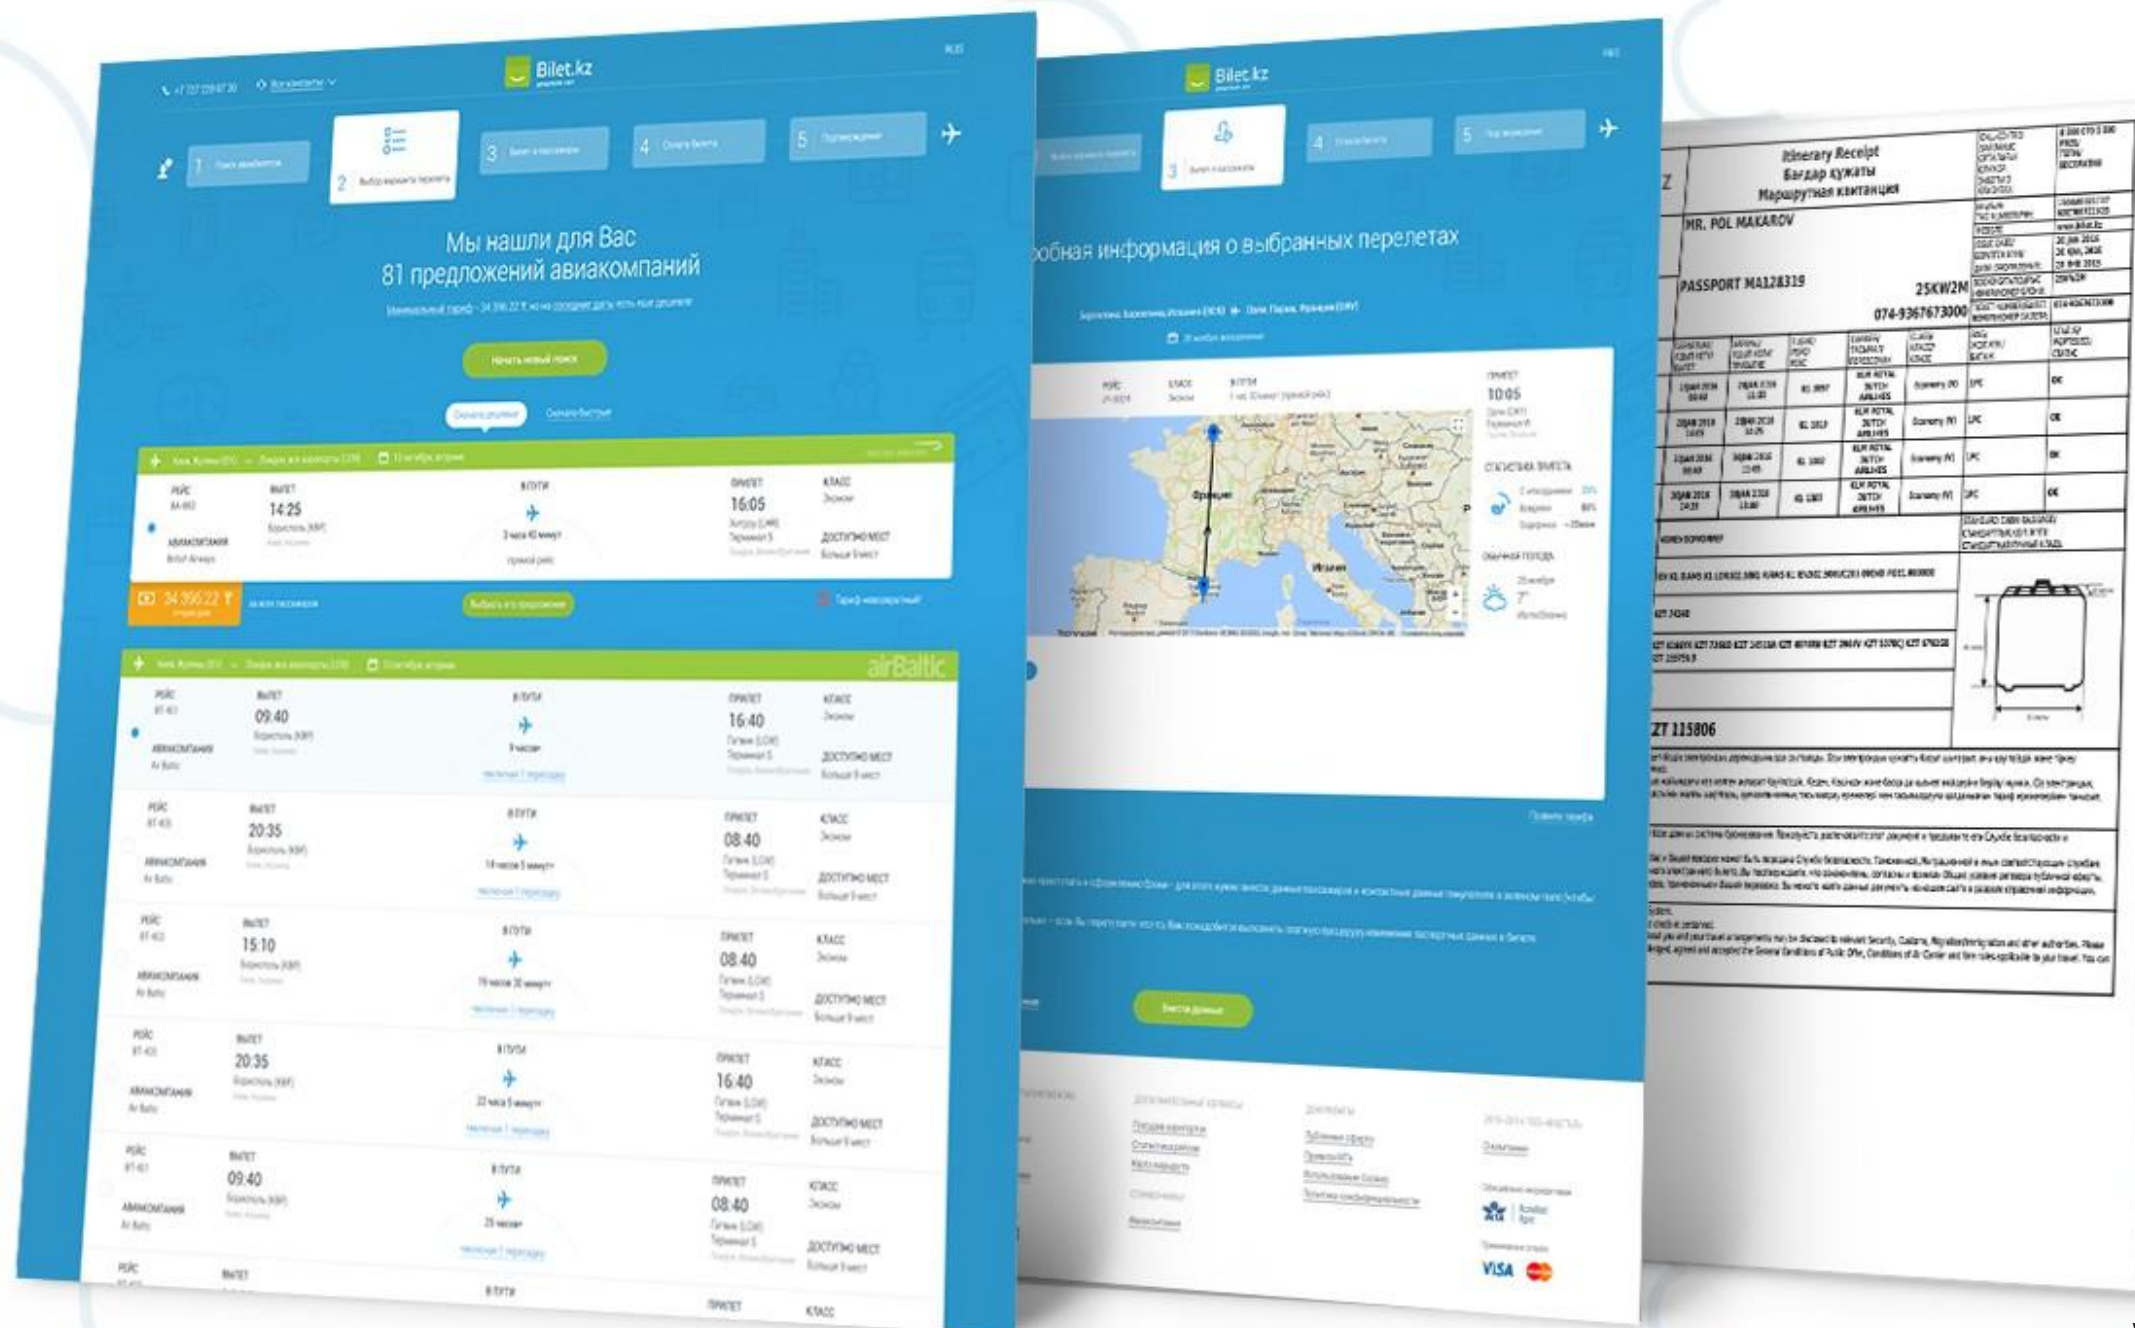

Air tickets sale portal.

Project tasks:

- to create the web-site suitable for users;
- to think over and implement high load service architecture;
- to integrate the reservation system (GDS) with access to more than 500 companies;
- tickets sorting by the parameters needed for the client;
- forecast of the flight delay;
- information about the airplane, which shall carry out the flight;
- information about the weather of the sending/receiving party;
- e-tickets generation.

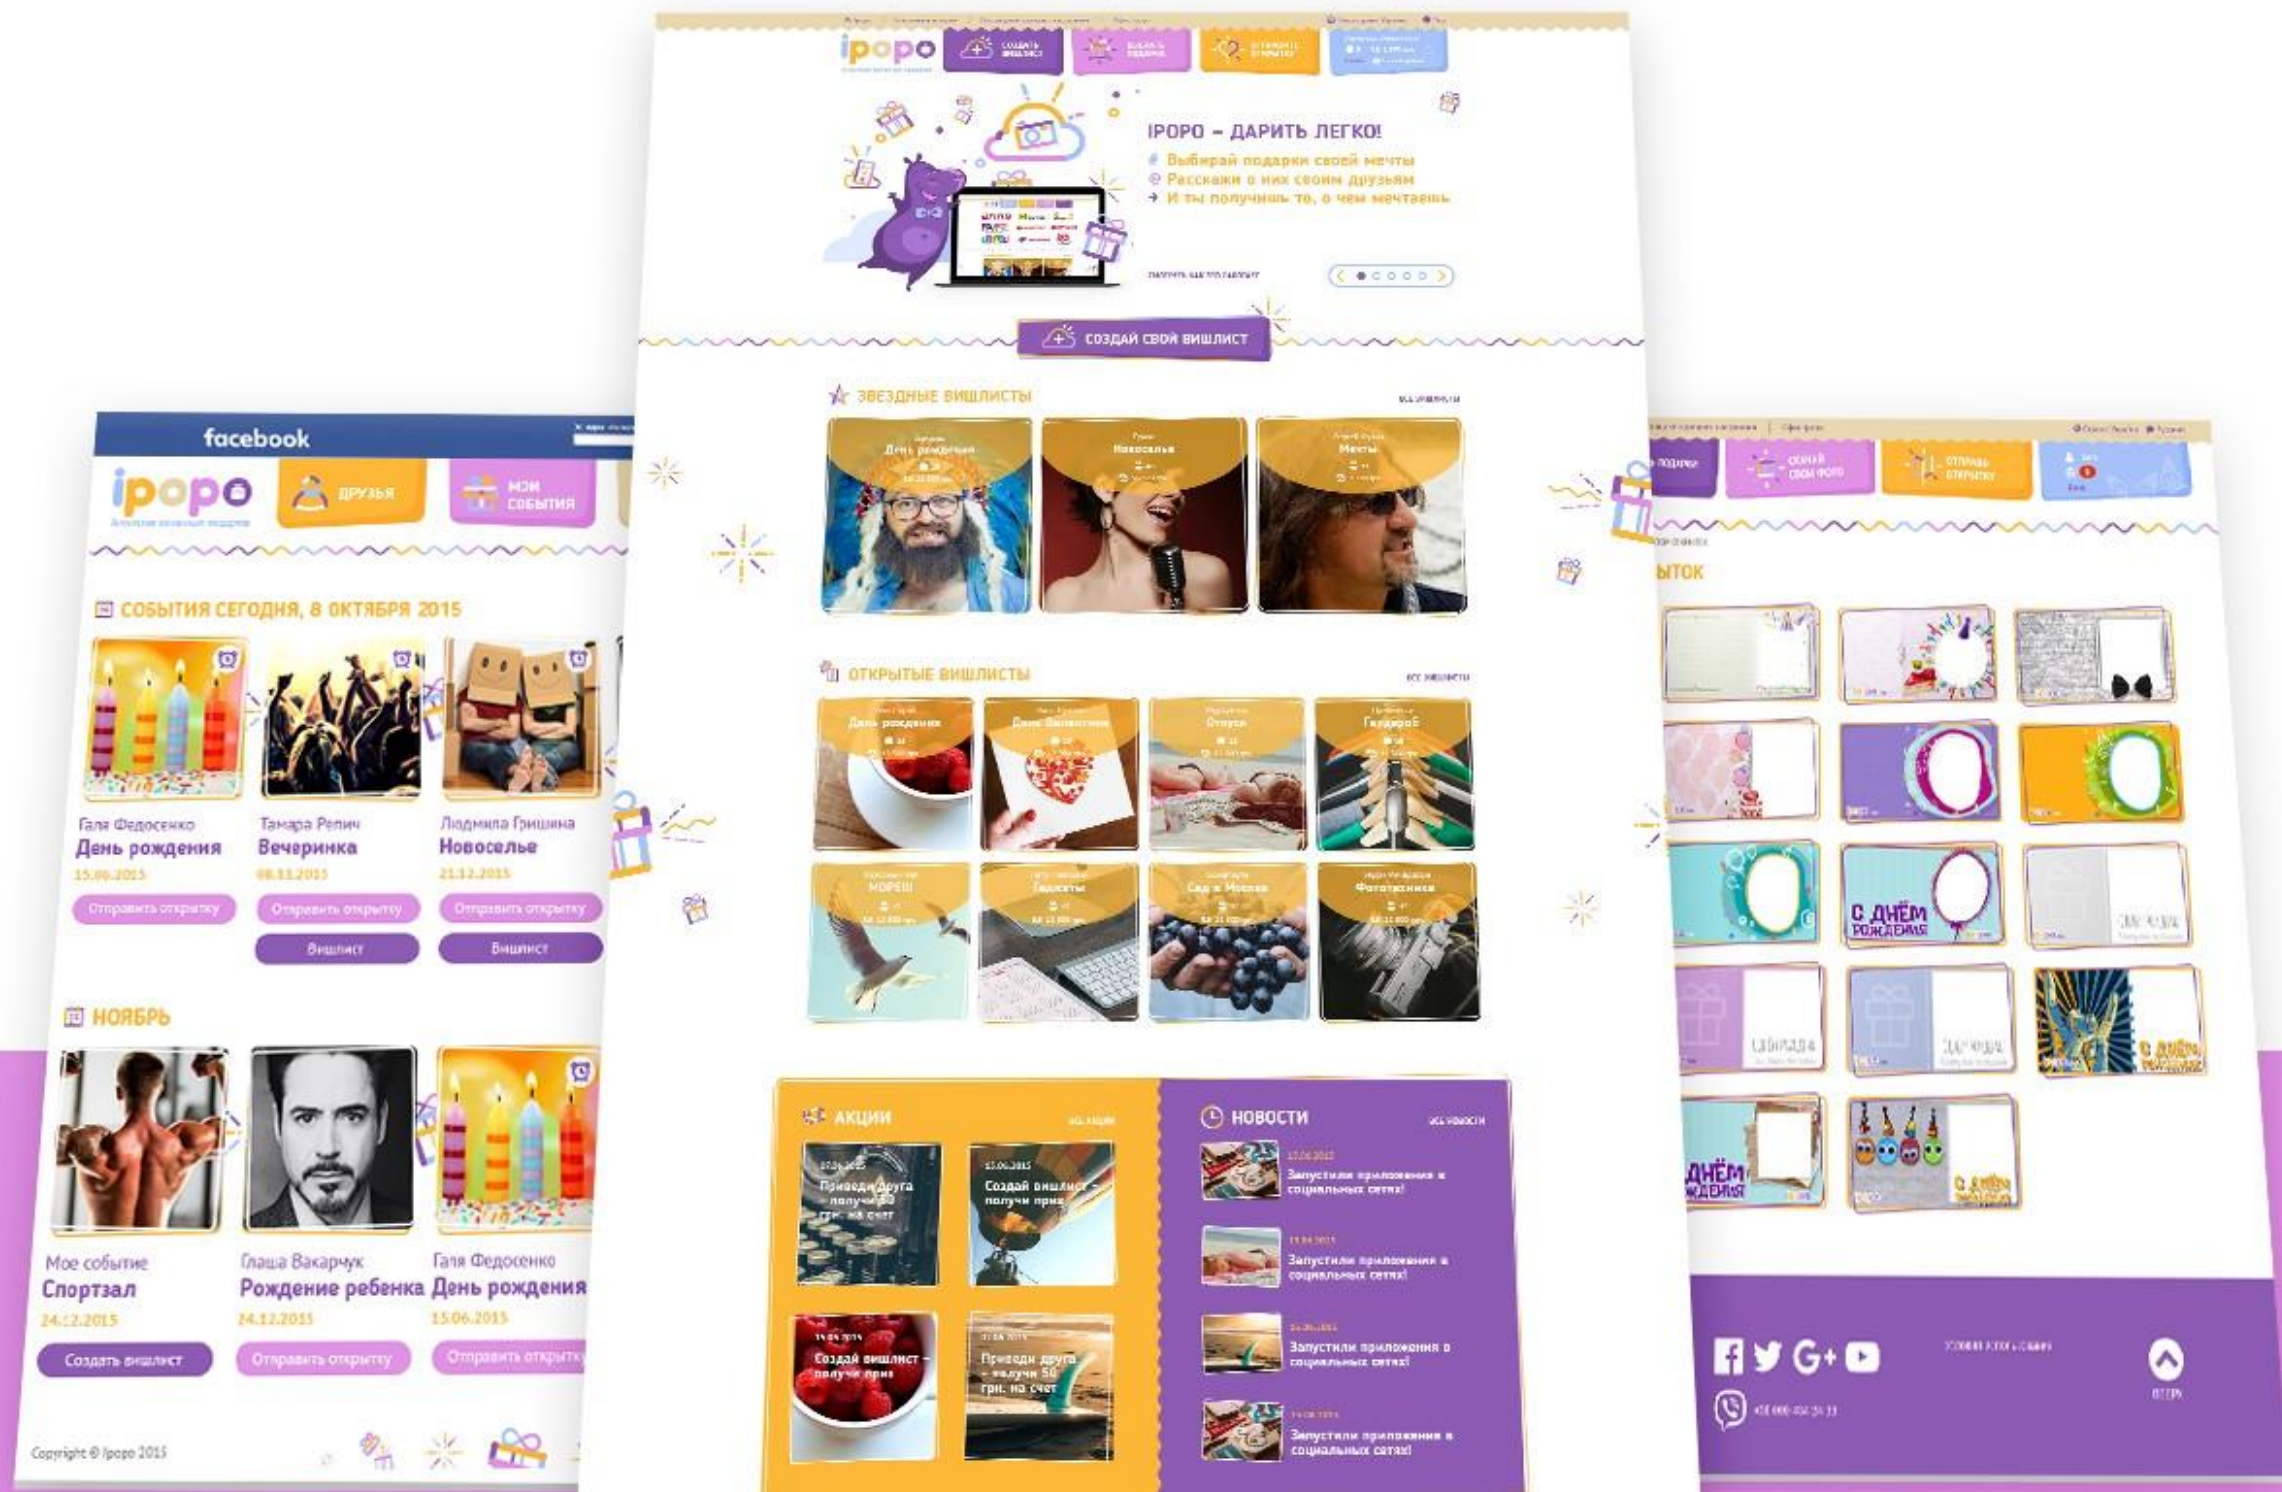

We carried out integrations with logistics and accounting for the digital equipment online shop. We developed and implemented transmission of the users' scenarios, developed working places for managers, and created integrations with the client's systems.

We developed architecture and infrastructure for the gifts service project, which unite the site, application, development of the partner's API for integration of online shops. We also integrated API of Nova Poshta and Facebook with the postcards creation module.

The background consists of several overlapping, semi-transparent red polygons of various shapes and sizes, creating a dynamic, layered effect. The colors range from a deep, dark red to a lighter, more vibrant red. The text is centered within one of the larger, darker red polygons.
